Notice of Public Comment Period and Public Hearing -- Progress Report for Utah's State Implementation Plan for Regional Haze

Pursuant to the public hearing requirements in Title 40 of the Code of Federal Regulations Part 51 section 102, the Utah Division of Air Quality (UDAQ) is issuing the following notice.

In 1999, the U.S. Environmental Protection Agency (EPA) adopted the Regional Haze Rule (RHR) requiring each affected state to develop and adopt a plan to improve the haziest days and protect the clearest days at each mandatory Class I area in the state with a goal of returning to natural visibility conditions by the year 2064. The UDAQ submitted a Regional Haze state implementation plan (SIP) to the EPA on December 12, 2003. The RHR requires progress reports every five years after the initial SIP is submitted. The UDAQ has prepared a draft "*Progress Report for Utah's State Implementation Plan for Regional Haze*" to meet the requirements of the federal rule.

The draft report and related materials are available for review on the UDAQ website at http://www.airquality.utah.gov/Public-Interest/Public-Commen-Hearings/Pubrule.htm or at the UDAQ offices at 195 N 1950 W, Salt Lake City, UT, 84114. A public hearing will be held to receive oral comments for the draft report on December 1, 2014 at 1:00 PM at 195 N 1950 W, Room No. 4100, Salt Lake City, UT.

Persons wishing to comment on the draft report during the public comment period may do so by submitting written comments to Mark Berger at mberger@utah.gov or to the UDAQ address listed above.

EXECUTIVE DOCUMENTS

Under authority granted by the Utah Constitution and various federal and state statutes, the Governor periodically issues **Executive Documents**, which can be categorized as either Executive Orders, Proclamations, and Declarations. Executive Orders set policy for the executive branch; create boards and commissions; provide for the transfer of authority; or otherwise interpret, implement, or give administrative effect to a provision of the Constitution, state law or executive policy. Proclamations call special or extraordinary legislative sessions; designate classes of cities; publish states-of-emergency; promulgate other official formal public announcements or functions; or publicly avow or cause certain matters of state government to be made generally known. Declarations designate special days, weeks or other time periods; call attention to or recognize people, groups, organizations, functions, or similar actions having a public purpose; or invoke specific legislative purposes (such as the declaration of an agricultural disaster).

The Governor's Office staff files **E**XECUTIVE **D**OCUMENTS that have legal effect with the Division of Administrative Rules for publication and distribution.

NOTICES OF PROPOSED RULES

A state agency may file a **PROPOSED RULE** when it determines the need for a substantive change to an existing rule. With a **NOTICE OF PROPOSED RULE**, an agency may create a new rule, amend an existing rule, repeal an existing rule, or repeal an existing rule and reenact a new rule. Filings received between <u>October 02, 2014, 12:00 a.m.</u>, and <u>October 15, 2014, 11:59 p.m.</u> are included in this, the <u>November 01, 2014</u>, issue of the *Utah State Bulletin*.

In this publication, each **PROPOSED RULE** is preceded by a **RULE ANALYSIS**. This analysis provides summary information about the **PROPOSED RULE** including the name of a contact person, anticipated cost impact of the rule, and legal cross-references.

Following the RULE ANALYSIS, the text of the PROPOSED RULE is usually printed. New rules or additions made to existing rules are underlined (<u>example</u>). Deletions made to existing rules are struck out with brackets surrounding them ([example]). Rules being repealed are completely struck out. A row of dots in the text between paragraphs (....) indicates that unaffected text from within a section was removed to conserve space. Unaffected sections are not usually printed. If a PROPOSED RULE is too long to print, the Division of Administrative Rules may include only the RULE ANALYSIS. A copy of each rule that is too long to print is available from the filing agency or from the Division of Administrative Rules.

The law requires that an agency accept public comment on **PROPOSED RULES** published in this issue of the *Utah State Bulletin* until at least <u>December 1, 2014</u>. The agency may accept comment beyond this date and will indicate the last day the agency will accept comment in the **RULE ANALYSIS**. The agency may also hold public hearings. Additionally, citizens or organizations may request the agency hold a hearing on a specific **PROPOSED RULE**. Section 63G-3-302 requires that a hearing request be received by the agency proposing the rule "in writing not more than 15 days after the publication date of the proposed rule."

From the end of the public comment period through <u>March 1, 2015</u>, the agency may notify the Division of Administrative Rules that it wants to make the **P**ROPOSED **R**ULE effective. The agency sets the effective date. The date may be no fewer than seven calendar days after the close of the public comment period nor more than 120 days after the publication date of this issue of the *Utah State Bulletin*. Alternatively, the agency may file a **CHANGE IN PROPOSED RULE** in response to comments received. If the Division of Administrative Rules does not receive a **Notice of Effective Date of a CHANGE IN PROPOSED RULE** in **PROPOSED RULE** in **PROPOSED RULE**, the **PROPOSED RULE** lapses.

The public, interest groups, and governmental agencies are invited to review and comment on **PROPOSED RULES**. Comment may be directed to the contact person identified on the **R**ULE **ANALYSIS** for each rule.

PROPOSED RULES are governed by Section 63G-3-301, Rule R15-2, and Sections R15-4-3, R15-4-4, R15-4-5a, R15-4-9, and R15-4-10.

RULE ANALYSIS

PURPOSE OF THE RULE OR REASON FOR THE CHANGE: The purpose of this rule filing is to: 1) add the use of continuing education courses provided via the Internet as an acceptable means of completing the 16 hours of continuing education; and 2) add an academic exam requirement for the six hours of classroom firearms instruction.

SUMMARY OF THE RULE OR CHANGE: In Subsection R156-63b-304(2), deletes the words "formal classroom". New Subsection R156-63b-304(3) adds the use of education courses provided via the Internet as a recognized means of completing the 16 hours of continuing education. Remaining subsections are renumbered. Subsection R156-63b-304(9) replaces the word "attendees" with the word "participants" for consistency with other subsections. Subsection R156-63b-304(10) adds the word "course" and the word "participant" and deletes the word "instructor" for clarity and consistency. Subsection R156-63b-304(10)(e) adds that the continuing education course certificate shall also include the name of the course instructor. The new Subsection R156-63b-604(2) adds an academic exam requirement for the six hours of classroom firearms instruction.

STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS RULE: Section 58-63-101 and Subsection 58-1-106(1) (a) and Subsection 58-1-202(1)(a)

ANTICIPATED COST OR SAVINGS TO:

◆ THE STATE BUDGET: The Division will incur minimal costs of approximately \$75 to print and distribute the rule once the proposed amendments are made effective. Any costs incurred will be absorbed in the Division's current budget.

◆ LOCAL GOVERNMENTS: The proposed amendments only apply to licensed armored car security officers and applicants for licensure in that classification. As a result, the proposed amendments do not apply to local governments.

♦ SMALL BUSINESSES: The proposed amendments may decrease the cost of continuing education courses for armored car security officer small businesses by adding the use of Internet courses as an approved type of continuing education provider. The proposed amendments may increase the cost for providers offering the basic firearms training program by requiring an academic exam. This cost may be passed on to the overall cost to licensees for basic firearms training. However, due to a wide range of circumstances, the Division is not able to determine either an exact decrease in costs relating to continuing education courses or an exact increase in requiring an academic exam for basic firearms training programs.

◆ PERSONS OTHER THAN SMALL BUSINESSES, BUSINESSES, OR LOCAL GOVERNMENTAL ENTITIES: The proposed amendments only apply to licensed armored car security officers and applicants for licensure in that classification. As a result, the proposed amendments will not impact other persons.

COMPLIANCE COSTS FOR AFFECTED PERSONS: The proposed amendments may decrease the amount licensees pay for continuing education courses. The filing may increase the cost for providers offering the basic firearms training programs by requiring the addition of an academic exam. This additional cost may be passed on to the overall cost to licensees for basic firearms training. However, due to a wide range of circumstances, the Division is not able to determine either an exact decrease in costs relating to continuing education courses or an exact increase in requiring an academic exam for basic firearms training programs.

COMMENTS BY THE DEPARTMENT HEAD ON THE FISCAL IMPACT THE RULE MAY HAVE ON BUSINESSES: This rule filing amends the armored care security officer continuing education requirement to allow credit for courses completed online, provided that the course includes a final examination. Businesses that choose to offer online courses will incur development costs. These costs will vary and cannot be quantified.

Provisions for Maintaining Student Membership and Enrollment Documentation and Documentation of Student Education Services Provided by Third Party Vendors

NOTICE OF PROPOSED RULE

(Amendment) DAR FILE NO.: 38913 FILED: 10/15/2014

RULE ANALYSIS

PURPOSE OF THE RULE OR REASON FOR THE CHANGE: The purpose of Section R277-419-9 is to provide direction to local education agencies (LEAs) about student membership and enrollment documentation for the 2014 - 2015 school year. Section R277-419-9 also requires the State Superintendent of Public Instruction (Superintendent) to review nontraditional programs managed by third party vendors. Additionally, it requires LEAs that contract with a third party vendor for nontraditional programs to monitor and supervise the vendor throughout the administration of the services and ensure compliance with law and Utah State Board of Education (Board) administrative rules.

SUMMARY OF THE RULE OR CHANGE: Rule R277-419 provides language: describing traditional and nontraditional programs, differentiated by the instructional methods and delivery methods; requiring all LEAs and all public school programs to comply with the provisions of Rule R277-419; requiring an LEA with nontraditional programs to establish a written policy with a "continuing enrollment measurement" to satisfy the requirements of Rule R277-419; requiring all LEA nontraditional programs, which are solely managed by a third party, to submit documentation demonstrating compliance with law and Board rule as required by the Board prior to initiating the program; and allowing the Superintendent to withhold funds from LEAs or public education programs for non-compliance with Rule R277-419 and allowing an appeal to the Board.

STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS RULE: Subsection 53A-1-402(1)(e)

ANTICIPATED COST OR SAVINGS TO:

◆ THE STATE BUDGET: Specific Utah State Office of Education and Board employees will have increased responsibilities as a result of Section R277-419-9. For the

present, additional responsibilities will be accomplished by existing staff and within existing budgets.

◆ LOCAL GOVERNMENTS: Specific school/LEA employees will have increased responsibilities as a result of Section R277-419-9. At least for the present, additional responsibilities will be accomplished by existing staff and within existing budgets. Increased Minimum School Program (MSP) funds for serving students in nontraditional programs may supplement an LEA's budget for documentation and accountability responsibilities. LEAs may also receive significant MSP funds for serving students through third party vendors, subject to accountability criteria.

◆ SMALL BUSINESSES: Section R277-419-9 provides direction to LEAs about student membership and enrollment documentation for both traditional and nontraditional schools and programs. The costs for documentation of enrollment and compliance efforts will be borne by LEAs that contract with third party vendors. The vendors (small businesses) may bear minimal documentation costs.

◆ PERSONS OTHER THAN SMALL BUSINESSES, BUSINESSES, OR LOCAL GOVERNMENTAL ENTITIES: Section R277-419-9 provides direction to LEAs about student membership and enrollment documentation for both traditional and nontraditional schools and programs which likely will not result in a cost or savings to persons other than small businesses, businesses, or local government entities.

COMPLIANCE COSTS FOR AFFECTED PERSONS: LEAs and the USOE will have responsibilities--individual persons have no specific duties.

COMMENTS BY THE DEPARTMENT HEAD ON THE FISCAL IMPACT THE RULE MAY HAVE ON BUSINESSES: I have reviewed this rule and I believe that the fiscal impact on businesses is unlikely. LEAs will bear any additional costs for documentation and accountability due to this rule.

Section IX, Control Measures for Area and Point Sources, Part H, Emissions Limits

NOTICE OF PROPOSED RULE

(Amendment) DAR FILE NO.: 38899 FILED: 10/06/2014

RULE ANALYSIS

PURPOSE OF THE RULE OR REASON FOR THE CHANGE: The Air Quality Board has proposed adding new sections IX.H.21 and 22, Control Measures for Area and Point Sources, Emission Limits and Operating Practices, Regional Haze Requirements, to the state implementation plan (SIP). Because Section R307-110-17 is the section that incorporates the latest version of Part H of the SIP, the rule needs to be amended as well. The SIP is being amended because on 12/14/2012 the EPA approved the majority of Utah's Regional Haze SIP (RH SIP), but disapproved Utah's Best Available Retrofit Technology (BART) determinations for NOx and particulate matter (PM) for PacifiCorp's Hunter Unit 1, Hunter Unit 2, Huntington Unit 1, and Huntington Unit 2 that were adopted by the Air Quality Board in 2008. Specifically, EPA determined that the approval orders and operating permits for PacifiCorp's Hunter and Huntington plants were not practicably enforceable.

SUMMARY OF THE RULE OR CHANGE: Two new sections are added to Part H of the SIP to include enforceable BART conditions and emission limitations for particulate matter and NOx for PacifiCorp's Hunter and Huntington plants.

STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS RULE: Subsection 19-2-104(3)(e)

MATERIALS INCORPORATED BY REFERENCES:

 ◆ Updates State Implementation Plan, Section IX, Control Measures for Area and Point Sources, Part H, Emissions Limits, published by State of Utah, Division of Air Quality, 01/07/2015

ANTICIPATED COST OR SAVINGS TO:

THE STATE BUDGET: The new sections of Part H only apply to PacifiCorp's Hunter and Huntington plants; therefore, there are no anticipated costs or savings to the state budget.
 LOCAL GOVERNMENTS: The new sections of Part H only apply to PacifiCorp's Hunter and Huntington plants; therefore, there are no anticipated costs or savings to local government.
 SMALL BUSINESSES: The new sections of Part H only apply to PacifiCorp's Hunter and Huntington plants; therefore, there are no anticipated costs or savings to local government.
 SMALL BUSINESSES: The new sections of Part H only apply to PacifiCorp's Hunter and Huntington plants; therefore, there are no anticipated costs or savings to small businesses.
 PERSONS OTHER THAN SMALL BUSINESSES, BUSINESSES, OR LOCAL GOVERNMENTAL ENTITIES: The new sections of Part H only apply to PacifiCorp's Hunter and Huntington plants; therefore, there are no anticipated costs or savings to persons other than small businesses, businesses, or local government entities.

COMPLIANCE COSTS FOR AFFECTED PERSONS: The emission limits in Part H should not result in any additional compliance costs as the limits are already established in PacifiCorp's approval orders and operating permits. This new section was added to Part H to ensure that the limits are practicably enforceable.

COMMENTS BY THE DEPARTMENT HEAD ON THE FISCAL IMPACT THE RULE MAY HAVE ON BUSINESSES: The emission limits in Part H should not have a fiscal impact on businesses as the limits are already established in PacifiCorp's approval orders and operating permits. This new section was added to Part H to ensure that the limits are practicably enforceable.

NOTICE OF PROPOSED RULE

(Amendment) DAR FILE NO.: 38900 FILED: 10/06/2014

RULE ANALYSIS

PURPOSE OF THE RULE OR REASON FOR THE CHANGE: The Air Quality Board has proposed amending state implementation plan (SIP) Section XX.D.6, Regional Haze, Long-Term Strategy for Stationary Sources, Best Available Control Technology (BART) Assessment for NOx and PM. Because Section R307-110-28 incorporates the latest version of the SIP adopted by the Air Quality Board, the rule needs to be amended as well. The SIP is being amended because on 12/14/2012 the EPA approved the majority of Utah's Regional Haze SIP (RH SIP), but disapproved Utah's Best Available Retrofit Technology (BART) determinations for NOx and particulate matter (PM) for PacifiCorp's Hunter Unit 1, Hunter Unit 2, Huntington Unit 1, and Huntington Unit 2 that were adopted by the Air Quality

Board in 2008. Specifically, EPA determined that the SIP did not contain a five-factor analysis as required by the rule. The resulting proposed amendments to the SIP are recommended after considering the new five-factor analysis, monitoring data, and the impact of pending federal regulations.

SUMMARY OF THE RULE OR CHANGE: The rule is changed to incorporate the version of the RH SIP as adopted by the Air Quality Board on 01/07/2015. The RH SIP is amended to: 1) correct typographic errors in Table 5 to reflect the 0.015 lb/MMBtu PM limit in the approval orders for Hunter Units 1 and 2 and include the 74 lb/hr emission rate for Huntington Unit 1 and the 70 lb/hr emission rate for Huntington Unit 2; 2) add an enforceable requirement to shut down Carbon Unit 1 and Carbon Unit 2 by 04/15/2015; and 3) add clarifying language and grammatical corrections.

ANTICIPATED COST OR SAVINGS TO:

◆ THE STATE BUDGET: There are no changes in the SIP or the rule that affect the state; therefore, there are no anticipated costs or savings to the state budget.

◆ LOCAL GOVERNMENTS: There are no changes in the SIP or the rule that affect local government; therefore, there are no anticipated costs or savings.

♦ SMALL BUSINESSES: The changes made to the SIP address BART determinations for PacifiCorp. Because PacifiCorp employs more than 50 persons, there are no anticipated costs or savings to small businesses.

• PERSONS OTHER THAN SMALL BUSINESSES, BUSINESSES, OR LOCAL GOVERNMENTAL ENTITIES: Because the changes made to the SIP only affect PacifiCorp, there are no anticipated costs or savings to persons other than small businesses, businesses, or local government entities.

COMPLIANCE COSTS FOR AFFECTED PERSONS: The plan requires that Carbon units 1 and 2 shall be retired by 04/15/2015. Because PacifiCorp had already announced the closure of these units, there are no additional compliance costs to them.

COMMENTS BY THE DEPARTMENT HEAD ON THE FISCAL IMPACT THE RULE MAY HAVE ON BUSINESSES: The plan requires that Carbon units 1 and 2 shall be retired by 04/15/2015. Because PacifiCorp had already announced the closure of these units, there are no additional compliance costs to them.

Environmental Quality, Air Quality **R307-401-19** General Approval Order

NOTICE OF PROPOSED RULE

(Amendment) DAR FILE NO.: 38901 FILED: 10/07/2014

RULE ANALYSIS

PURPOSE OF THE RULE OR REASON FOR THE CHANGE: In November 2013, the Air Quality Board adopted a new rule that provides authority for the director to issue a general approval order (GAO) that would apply to a category of similar type sources. The first GAO developed by the Division of Air Quality (DAQ) was issued in June 2014, and

applies to crude oil and natural gas well sites. During the development of this GAO, DAQ engineers discovered that a limitation in the rule is unnecessarily restrictive as the first level of review could potentially screen out sources that could meet the second level of review.

SUMMARY OF THE RULE OR CHANGE: The proposed change to the rule allows coverage under a general approval order if a demonstration is completed that meets the requirements of Subsection R307-410-5(1)(c)(ii).

STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS RULE: Section 19-2-108 and Subsection 19-2-104(3) (q)

ANTICIPATED COST OR SAVINGS TO:

◆ THE STATE BUDGET: Because the proposed change is to fix a provision in the rule that made it unnecessarily restrictive for sources to get coverage under a GAO, there are no anticipated costs or savings to the state budget.

◆ LOCAL GOVERNMENTS: Because the proposed change is to fix a provision in the rule that made it unnecessarily restrictive for sources to get coverage under a GAO, there are no anticipated costs or savings to local government.

◆ SMALL BUSINESSES: Because the proposed change is to fix a provision in the rule that made it unnecessarily restrictive for sources to get coverage under a GAO, there are no anticipated costs or savings to small businesses.

◆ PERSONS OTHER THAN SMALL BUSINESSES, BUSINESSES, OR LOCAL GOVERNMENTAL ENTITIES: Because the proposed change is to fix a provision in the rule that made it unnecessarily restrictive for sources to get coverage under a GAO, there are no anticipated costs or savings to persons other than small businesses, businesses, or local government entities.

COMPLIANCE COSTS FOR AFFECTED PERSONS: The proposed change is to fix a provision in the rule that made it unnecessarily restrictive for sources to get coverage under a GAO. It would allow sources to get coverage under a GAO if a demonstration is completed that meets the requirements of Subsection R307-410-5(1)(c)(ii). The requirements in this section remain the same; therefore, there are no additional compliance costs for affected persons.

COMMENTS BY THE DEPARTMENT HEAD ON THE FISCAL IMPACT THE RULE MAY HAVE ON BUSINESSES: The proposed change is to fix a provision in the rule that made it unnecessarily restrictive for sources to get coverage under a GAO. It would allow sources to get coverage under a GAO if a demonstration is completed that meets the requirements of Subsection R307-410-5(1)(c)(ii). The requirements in this section remain the same; therefore, this rule amendment should have no fiscal impact on businesses.

AUTHORIZED BY: Bryce Bird, Director

R307. Environmental Quality, Air Quality. R307-401. Permit: New and Modified Sources. R307-401-19. General Approval Order.

(1) The director may issue a general approval order that would establish conditions for similar new or modified sources of the same type or for specific types of equipment. The general approval order may apply throughout the state or in a specific area.

(a) A major source or major modification as defined in R307-403, R307-405, or R307-420 for each respective area is not eligible for coverage under a general approval order.

(b) A source that is subject to the requirements of R307-403-5 is not eligible for coverage under a general approval order.

(c) A source that is subject to the requirements of R307-410-4 is not eligible for coverage under a general approval order unless a demonstration that meets the requirements of R307-410-4 was conducted.

(d) A source that is subject to the requirements of R307-410-5(1)(c)(ii) [$\overline{\text{or}}$ -]is not eligible for coverage under a general_approval order unless a demonstration that meets the requirements of R307-410-5(1)(c)(ii) was conducted.

(e) A source that is subject to the requirements of R307-410-5(1)(c)(iii) is not eligible for coverage under a general approval order.

(2) A general approval order shall meet all applicable requirements of R307-401-8.

(3) The public notice requirements in R307-401-7 shall apply to a general approval order except that the director will advertise the notice of intent in a newspaper of statewide circulation.

(4) Application.

(a) After a general approval order has been issued, the owner or operator of a proposed new or modified source may apply to be covered under the conditions of the general approval order.

(b) The owner or operator shall submit the application on forms provided by the director in lieu of the notice of intent requirements in R307-401-5 for all equipment covered by the general approval order.

(c) The owner or operator may request that an existing, individual approval order for the source be revoked, and that it be covered by the general approval order.

(d) The owner or operator that has applied to be covered by a general approval order shall not initiate construction, modification, or relocation until the application has been approved by the director. (5) Approval.

(a) The director will review the application and approve or deny the request based on criteria specified in the general approval order for that type of source. If approved, the director will issue an authorization to the applicant to operate under the general approval order.

(b) The public notice requirements in R307-401-7 do not apply to the approval of an application to be covered under the general approval order.

(c) The director will maintain a record of all stationary sources that are covered by a specific general approval order and this record will be available for public review.

(6) Exclusions and Revocation.

(a) The director may require any source that has applied for or is authorized by a general approval order to submit a notice of intent and obtain an individual approval order under R307-401-8. Cases where an individual approval order will be required include, but are not limited to, the following:

(i) the director determines that the source does not meet the criteria specified in the general approval order;

(ii) the director determines that the application for the general approval order did not contain all necessary information to evaluate applicability under the general approval order;

(iii) modifications were made to the source that were not authorized by the general approval order or an individual approval order;

(iv) the director determines the source may cause a violation of a national ambient air quality standard; or

(v) the director determines that one is required based on the compliance history and current compliance status of the source or applicant.

(b)(i) Any source authorized by a general approval order may request to be excluded from the coverage of the general approval order by submitting a notice of intent under R307-401-5 and receiving an individual approval order under R307-401-8.

(ii) When the director issues an individual approval order to a source subject to a general approval order, the applicability of the general approval order to the individual source is revoked on the effective date of the individual approval order.

(7) Modification of General Approval Order. The director may modify, replace, or discontinue the general approval order.

(a) Administrative corrections may be made to the existing version of the general approval order. These corrections are to correct typographical errors or similar minor administrative changes.

(b) All other modifications or the discontinuation of a general approval order shall not apply to any source authorized under previous versions of the general approval order unless the owner or operator submits an application to be covered under the new version of the general approval order. Modifications under R307-401-19(7)(b) shall meet the public notice requirements in R307-401-19(3).

(c) A general approval order shall be reviewed at least every three year. The review of the general approval order shall follow the public notice requirements of R307-401-19(3).

(8) Modifications at a source covered by a general approval order. A source may make modifications only as authorized by the approved general approval order. Modifications outside the scope authorized by the approved general approval order shall require a new application for either an individual approval order under R307-401-8 or a general approval order under R307-401-19.

Environmental Quality, Radiation Control **R313-19**

Requirements of General Applicability to Licensing of Radioactive Material

NOTICE OF PROPOSED RULE

(Amendment) DAR FILE NO.: 38907 FILED: 10/14/2014

RULE ANALYSIS

PURPOSE OF THE RULE OR REASON FOR THE CHANGE: Incorporation of rule changes related to the adoption of new rules governing the physical protection of category 1 and category 2 quantities of radioactive material in a new proposed Rule R313-37, and clarifying language in Section R313-19-2.

SUMMARY OF THE RULE OR CHANGE: Reference to the new rule, R313-37, is included in Section R313-19-2, and the wording in this rule was clarified and reordered for improved ease of reading. Section R313-19-7 was added to grant an exemption from licensing to common and contract carriers who transport and store incident to transport radioactive materials or devices containing radioactive material. The incorporation by reference of the applicable regulations in 10 CFR 71 in Section R313-19-100 was updated to the 2014 edition of 10 CFR 71.

STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS RULE: 10 CFR 30.13 and 10 CFR 71.97(b) and Subsection 19-3-104(4) and Subsection 19-3-104(8)

MATERIALS INCORPORATED BY REFERENCES: • Updates 10 CFR 71, published by Government Printing Office, 01/01/2014

ANTICIPATED COST OR SAVINGS TO:

◆ THE STATE BUDGET: There would be no anticipated costs or savings to the state budget since the changes in Section R313-19-2 only describe the applicability of the various rules of the Utah Radiation Control Rules, exempting common and contract carriers from licensing does not remove a requirement since the Division doesn't currently license these groups, and the change in the incorporation by reference in Section R313-19-100 addresses a change to the advanced notification of the shipment of certain quantities and types of radioactive material.

◆ LOCAL GOVERNMENTS: There would be no anticipated costs or savings to local government since the changes to rule do not impact local governments.

♦ SMALL BUSINESSES: There would be no anticipated costs or savings to small businesses since the rule changes do not add to or remove existing rules that may affect small businesses.

◆ PERSONS OTHER THAN SMALL BUSINESSES, BUSINESSES, OR LOCAL GOVERNMENTAL ENTITIES: There would be no anticipated costs or savings to persons other than small businesses, businesses, or local government entities since the rule changes do not add to or remove existing rules that may affect these persons.

COMPLIANCE COSTS FOR AFFECTED PERSONS: There are no anticipated costs for affected persons since the proposed rule changes do not add new requirements that would cause affected persons to incur any changes in compliance costs.

COMMENTS BY THE DEPARTMENT HEAD ON THE FISCAL IMPACT THE RULE MAY HAVE ON BUSINESSES: The proposed change to the rule is necessary for the Utah Radiation Control Rules to be compatible with NRC requirements, and to ensure that the Division's program activities are adequate to protect the public health and safety. The Division is not aware of any business that would be impacted fiscally due to the proposed rule changes.

Category 2 Quantities of Radioactive Material

NOTICE OF PROPOSED RULE

(New Rule) DAR FILE NO.: 38908 FILED: 10/14/2014

RULE ANALYSIS

PURPOSE OF THE RULE OR REASON FOR THE CHANGE: The purpose is to incorporate by reference the requirements in 10 CFR 37 for the protection of category 1 and category 2 quantities of radioactive materials. This rule codifies requirements previously imposed on holders of a Utah Radioactive Material License to possess such quantities of radioactive material through an order issued by the U.S. Nuclear Regulatory Commission or by license condition.

SUMMARY OF THE RULE OR CHANGE: The rule will replace the requirements for the physical protection of significant quantities of radioactive materials possessed by Utah radioactive material licensees that were previously imposed under an NRC order or through special conditions in the licensee's license. In promulgating 10 CFR 37, the U.S. Nuclear Regulatory Commission modified some of the requirements for the physical protection and security of these quantities of radioactive material, and imposed additional requirements on the NRC's licensees. As an agreement state, the Utah Radiation Control Board must adopt compatible regulations to those of the NRC in order to maintain a regulatory program that is adequate for the health and safety of the public from sources of radiation. Agreement states are given three years from the publication date of the final rule in the Federal Register to adopt compatible regulations. In order to assist the agreement states in their adoption of these requirements, the NRC has established compatibility categories for its rules, and has determined the compatibility categories for the requirements to be adopted. The Division of Radiation Control has reviewed the compatibility categories for the requirements in 10 CFR 37, and has included all requirements necessary to have compatible regulations and maintain an adequate regulatory program.

STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS RULE: 10 CFR 37 and Subsection 19-3-104(4) and Subsection 19-3-104(8)

MATERIALS INCORPORATED BY REFERENCES: Adds 10 CFR 37, published by Government Printing Office, 01/01/2014

ANTICIPATED COST OR SAVINGS TO:

◆ THE STATE BUDGET: While it is anticipated that the amount of time spent by Division staff in inspecting affected licensees' compliance with the new rules will be increased, no fees are associated with the inspection of radioactive material licensees, and the inspection activities of Division staff would be a normal part of staff work activities. As such, no costs or savings are anticipated to impact the state budget.

◆ LOCAL GOVERNMENTS: While the increased security measures imposed by NRC orders or through license conditions required licensed to coordinate with local law enforcement agencies in their response to actual or attempted unauthorized access to significant quantities of radioactive material, changes to this requirement due to the new rule will likely require the affected licensees to have more frequent contact and coordination with local law enforcement agencies. This may result in additional time spent by local law enforcement officers in coordinating their response with affected licensees. While these additional coordination activities may result in additional costs to local government, they are variable and the Division is not able to provide a reasonable estimate of the cost.

◆ SMALL BUSINESSES: There are a number of changes to the requirements previously imposed under an NRC order or by license condition in the new rule that will likely have a fiscal impact on all affected licensees, including small businesses that possess significant quantities of radioactive material. While the potential financial impact on affected small businesses is unknown, the NRC estimated that, on average, a licensee would have a one time cost of approximately \$23,375 and an annual cost of approximately \$21,736 to fully implement the final rule. It is the Division's opinion that these cost estimates are overly conservative, and the actual additional costs to affected licensees is likely to be much less. This is because the current affected licensees already have in place increased security measures, and the additional requirements in the new rule will only require affected licensees to implement enhancements and improvements to their existing security measures. A more reasonable estimate for the maximum one time and annual costs to affected licensees might be \$10,000 and \$5,000, respectively, per licensee. At this time, there are approximately 17 radioactive material licensees that would be subject to the new rule. The maximum total costs to all licensees is estimated to be: \$170,000 (one time costs) and \$85,000 (annual costs).

◆ PERSONS OTHER THAN SMALL BUSINESSES, BUSINESSES, OR LOCAL GOVERNMENTAL ENTITIES: It is not anticipated that there would be any costs to any person other than small businesses, businesses, or local government entities.

COMPLIANCE COSTS FOR AFFECTED PERSONS: As discussed earlier, the maximum anticipated cost to an affected licensee might be \$10,000 (one time cost) and \$5,000 annually.

COMMENTS BY THE DEPARTMENT HEAD ON THE FISCAL IMPACT THE RULE MAY HAVE ON BUSINESSES: The proposed change to the rule is necessary for the Utah Radiation Control Rules to be compatible with NRC requirements, and to ensure that the Division's program activities are adequate to protect the public health and safety. The Division feels that the additional costs incurred by any affected business due to the proposed rule changes are reasonable and necessary to adequately secure significant quantities of radioactive material against theft, diversion, or sabotage. Such security measures are needed to secure valued assets of the affected businesses, and to protect the public health and safety.

RULE ANALYSIS

PURPOSE OF THE RULE OR REASON FOR THE CHANGE: The purpose of this amendment is to update the version of one document incorporated by reference within Rule R428-1; specifically, change Utah All-Payer Claims Database Data Submission Guide from Version 2.0 to Version 2.1. Also, drop obsolete reference to Technical Specifications v 1.3 from the rule since the document is no longer used or needed.

SUMMARY OF THE RULE OR CHANGE: The changes update material incorporated by reference to reflect technical requirements expected for compliance beginning April 2015, in particular: 1) adding and requiring more data fields to allow the Department to comply with the legislative requirement of providing information for coordination of benefits (COB) project; and 2) editing language on required submissions from stand-alone dental carriers--a future requirement-- to have more clarity regarding the timing and process for eventually including stand-alone dental data into the All Payer Claims Database. The changes also remove unnecessary language.

STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS RULE: Title 26, Chapter 33a

MATERIALS INCORPORATED BY REFERENCES:

 ◆ Updates Utah All Payer Claims Database: Data Submission Guide, published by Utah Department of Health, 10/15/2014

ANTICIPATED COST OR SAVINGS TO:

◆ THE STATE BUDGET: This rule amendment updates the version of data submittal manual for the All Payer Claims Database. The Utah Department of Health (UDOH) determines enactment of the amended version will not create any additional cost or savings impact to the state budget or UDOH's budget, since the change will not increase workload and can be carried out with existing budget.

◆ LOCAL GOVERNMENTS: This filing does not create any direct cost or savings impact to local governments since they are not directly affected by the rule; nor are local governments indirectly impacted because the rule does not create a situation requiring services from local governments.

♦ SMALL BUSINESSES: None--Small businesses are not impacted by this rule change, with all potentially impacted having more than 50 employees. As a result, the rule will have no effect on small business budgets for costs or savings.

◆ PERSONS OTHER THAN SMALL BUSINESSES, BUSINESSES, OR LOCAL GOVERNMENTAL ENTITIES: The most significant change in this update is the addition of more fields to allow the Department to comply with the legislative requirement of providing information for the COB. Other changes have been identified as relatively minor and necessary to ensure usefulness of the data for required reporting. These changes are part of an annual updating process and we will continue to work with data suppliers to minimize the programming requirements. Overall cost to the health carrier industry--specifically to those currently required to comply with the Data Submittal Guide listed in Rule R428-1--will total approximately \$252,000 (18 carriers x \$14,000).

COMPLIANCE COSTS FOR AFFECTED PERSONS: This rule amendment adds new requirements to the current Data Submittal Guide enforced as of April 2015. Data submitters will need to comply with this guide by developing and implementing modest changes to their existing data systems. An increase to the submitter's budget and workload may be experienced, depending on how many modifications are needed to be made for compliance. It is estimated to cost \$11,200 to \$16,800 per data submitter to comply with changes to the guide, which may not include all necessary staff time. This range is based on an estimated amount of \$14,000 per submitter for one FTE working approximately one month per Utah DTS price guidelines.

COMMENTS BY THE DEPARTMENT HEAD ON THE FISCAL IMPACT THE RULE MAY HAVE ON BUSINESSES: One of the purposes of this rule amendment is to support the statewide coordination of benefits (COB) project. The APCD data suppliers are participants in the COB project. Although there are estimated costs for each data supplier to update their technical programs of data submission, long-term benefits for the COB project participants may outweigh the initial cost of expanding data elements for the project.

RULE ANALYSIS

PURPOSE OF THE RULE OR REASON FOR THE CHANGE: The purpose of this amendment is to update language for "Data Submission Guide for Health Data" in Rule R428-2 by clarifying the effective dates for both technical documents referred to in the definition.

SUMMARY OF THE RULE OR CHANGE: The change proposes to add effective dates for documents incorporated by reference in Rule R428-1 relating to the All Payer Claims Database; specifically to clarify the Data Submittal Guide referenced in Subsection R428-1-4(5) is for data submissions required from 05/15/2014 to 03/31/2015; and the Data Submittal Guide referenced in Subsection R428-1-4(6) is for data submissions beginning 04/01/2015.

STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS RULE: Title 26, Chapter 33a

ANTICIPATED COST OR SAVINGS TO:

◆ THE STATE BUDGET: This rule amendment updates the version of data submittal manual for the All Payer Claims Database. The Utah Department of Health (UDOH) determines enactment of the amended version will not create any additional cost or savings impact to the state budget or UDOH's budget, since the change will not increase workload and can be carried out with existing budget.

◆ LOCAL GOVERNMENTS: This filing does not create any direct cost or savings impact to local governments since they are not directly affected by the rule; nor are local governments indirectly impacted because the rule does not create a situation requiring services from local governments.

◆ SMALL BUSINESSES: None--Small businesses are not impacted by this rule change. The rule will have no effect on small business budgets for costs or savings.

◆ PERSONS OTHER THAN SMALL BUSINESSES, BUSINESSES, OR LOCAL GOVERNMENTAL ENTITIES: Minor technical changes to Rule R428-2 will not result in costs or savings to businesses, individuals, local governments, and persons that are not small businesses.

COMPLIANCE COSTS FOR AFFECTED PERSONS: There are no compliance costs for affected persons. The change clarifies one definition and updates effective dates which do not result in compliance costs.

COMMENTS BY THE DEPARTMENT HEAD ON THE FISCAL IMPACT THE RULE MAY HAVE ON BUSINESSES: This rule amendment will not result in fiscal impact on data submitters because them amendments are minor technical changes.

NOTICE OF PROPOSED RULE

(New Rule) DAR FILE NO.: 38911 FILED: 10/15/2014

RULE ANALYSIS

PURPOSE OF THE RULE OR REASON FOR THE CHANGE: The purpose of this new rule is to implement Human Services rules for recovery residences as a result of the passing of H.B. 211 (2014 General Legislative Session). The new Rule R501-18 will establish basic health and safety standards for recovery residences.

SUMMARY OF THE RULE OR CHANGE: This rule establishes basic health, safety, and administration standards for recovery residences; procedures and standards for permitting a recovery residence to provide services to clients. In addition, the rule establishes and defines specific provisions regarding bathrooms, bedrooms, dining space, and staff training.

STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS RULE: Section 62A-2-101 and Section 62A-2-106

ANTICIPATED COST OR SAVINGS TO:

◆ THE STATE BUDGET: There is no anticipated cost or savings; it will have no impact on state government and will not affect the budget. Current workload will be unaffected by these new rules and implementation. Fees paid by the licensee and designated by the legislature will cover state efforts to provide this new license. H.B. 211 (2014) requires the fee to cover the Office of Licensing's costs.

◆ LOCAL GOVERNMENTS: This rule establishes requirements and regulations for recovery residences. It will have minimal impact on local government(s) and will not affect the budget. Local government(s) may in some cases need to provide business licenses, and health/fire inspections, however, this impact will be covered by their local requirements and protocols. It may even increase their revenue depending on their fee structure.

◆ SMALL BUSINESSES: The fee associated with this rule will impact the organizations applying for the new recovery

residence license. However, this fee is legislatively mandated as part of the cost of providing the recovery residence service.

◆ PERSONS OTHER THAN SMALL BUSINESSES, BUSINESSES, OR LOCAL GOVERNMENTAL ENTITIES: This rule establishes requirements and regulations for recovery residences. It will have minimal impact on other persons or entities.

COMPLIANCE COSTS FOR AFFECTED PERSONS: The compliance costs will be limited to recovery residence programs with the fees of \$1,295 for the license. Other costs incurred are related to doing business in this area. Requirements for this new license are comparable to that of other similar licenses. A public meeting to discuss fees was held on 07/21/2014. Two attendees from one provider were present. No objections to the fees were raised.

COMMENTS BY THE DEPARTMENT HEAD ON THE FISCAL IMPACT THE RULE MAY HAVE ON BUSINESSES: The fiscal impact on business will be minimal. The compliance costs of \$1,295 will be limited to recovery residence programs choosing to procure licenses in this area. Other costs incurred are related to doing business in the treatment industry. In addition to the cost incurred for the license, other costs incurred are largely related to ensuring compliance with basic health and safety standards.

Taking Fish and Crayfish

NOTICE OF PROPOSED RULE (Amendment) DAR FILE NO.: 38906 FILED: 10/14/2014

RULE ANALYSIS

PURPOSE OF THE RULE OR REASON FOR THE CHANGE: This rule is being amended pursuant to Regional Advisory Council and Wildlife Board meetings conducted annually for taking public input and reviewing the Division of Wildlife Resources' (DWR) fish and crayfish management program.

SUMMARY OF THE RULE OR CHANGE: This rule revision modifies the definition of "permanent residence" to allow for an at-home possession limit to be altered; it also provides language to allow for the use of crossbows and adds dead striped bass as a bait to be used in Lake Powell only.

STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS RULE: Section 23-14-18 and Section 23-14-19

ANTICIPATED COST OR SAVINGS TO:

◆ THE STATE BUDGET: This amendment allows Utah anglers to hold processed or frozen fish at their homes without it being included in their possession limit, it also adds crossbows as a legal angling method and allows for the use of dead striped bass as bait at Lake Powell. DWR determines that these amendments do not create a cost or savings impact to the state budget or DWR's budget, since the changes will not increase workload and can be carried out with existing budget.

◆ LOCAL GOVERNMENTS: Since this amendment only adds opportunity to anglers this should have little to no effect on local governments. This filing does not create any direct cost or savings impact to local governments because they are not directly affected by the rule. Nor are local governments indirectly impacted because the rule does not create a situation requiring services from local governments.

◆ SMALL BUSINESSES: This amendment provides additional opportunity to anglers, therefore, this rule does not impose any additional financial requirements on small businesses, nor generate a cost or savings impact to small businesses.

◆ PERSONS OTHER THAN SMALL BUSINESSES, BUSINESSES, OR LOCAL GOVERNMENTAL ENTITIES: This amendment provides additional opportunity to anglers, therefore, this rule does not impose any additional financial requirements on persons, nor generate a cost or savings impact to other persons.

COMPLIANCE COSTS FOR AFFECTED PERSONS: DWR determines that these amendments do not create a cost or savings impact to individuals who participate in fishing in Utah because it provides additional opportunity to anglers.

COMMENTS BY THE DEPARTMENT HEAD ON THE FISCAL IMPACT THE RULE MAY HAVE ON BUSINESSES: The amendments to this rule do not create an impact on businesses.

[______(5) If the proposed rate exceeds the certified rate,jurisdictions in which the fiscal year is the calendar year arerequired to hold public hearings even if budget hearings havealready been held for that fiscal year.

] [(6)](5) If the cost of public notice required under Section 59-2-919 is greater than one percent of the property tax revenues to be received, an entity may combine its advertisement with other entities, or use direct mail notification.

[(7)]<u>(6</u>) Calculation of the amount and percentage increase in property tax revenues required by Section 59-2-919 shall be computed by comparing property taxes levied for the current year with property taxes [eollected]budgeted the prior year, without adjusting for revenues attributable to new growth.

[(8)](7) If a taxing district has not completed the tax rate setting process as prescribed in Sections 59-2-919 and 59-2-920 by August 17, the county auditor must seek approval from the Tax Commission to use the certified rate in calculating taxes levied.

[(9)](8) The value of property subject to the uniform fee under Sections 59-2-405 through 59-2-405.3 is excluded from taxable value for purposes of calculating new growth, the certified tax rate, and the proposed tax rate.

[(10)](9) The value and taxes of property subject to the uniform fee under Sections 59-2-405 through 59-2-405.3[, as well as tax increment distributions and related taxable values of redevelopment renewal agencies,] are excluded when calculating the percentage of property taxes collected as provided in Section 59-2-[913]924.

[(11)](10) The following formulas and definitions shall be used in determining new growth:

(a) Actual new growth shall be computed as follows:

(i) the taxable value of property assessed by the commission and locally assessed real property for the current year adjusted for redevelopment minus year-end taxable value of property assessed by the commission and locally assessed real property for the previous year adjusted for redevelopment; then

(ii) plus or minus the difference between the taxable value of locally assessed personal property for the prior year adjusted for redevelopment and the year-end taxable value of locally assessed personal property for the year that is two years prior to the current year adjusted for redevelopment; then

(iii) plus or minus changes in value as a result of factoring; then

(iv) plus or minus changes in value as a result of reappraisal; then

(v) plus or minus any change in value resulting from a legislative mandate or court order.

(b) Net annexation value is the taxable value for the current year adjusted for redevelopment of all properties annexed into an entity during the previous calendar year minus the taxable value for the previous year adjusted for redevelopment for all properties annexed out of the entity during the previous calendar year.

(c) New growth is equal to zero for an entity with:

(i) an actual new growth value less than zero; and

(ii) a net annexation value greater than or equal to zero.

(d) New growth is equal to actual new growth for:

 $(i)\,$ an entity with an actual new growth value greater than or equal to zero; or

(ii) an entity with:

(A) an actual new growth value less than zero; and

(B) the actual new growth value is greater than or equal to the net annexation value.

(e) New growth is equal to the net annexation value for an entity with:

(i) a net annexation value less than zero; and

(ii) the actual new growth value is less than the net annexation value.

(f) Adjusted new growth equals new growth multiplied by the mean collection rate for the previous five years.

[(+2)](11)(a) For purposes of determining the certified tax rate, ad valorem property tax revenues budgeted by a taxing entity for the prior year are calculated by:

(i) increasing or decreasing the adjustable taxable value from the prior year Report 697 by the average of the percentage net change in the value of taxable property for the equalization period for the three calendar years immediately preceding the current calendar year; and

(ii) multiplying the result obtained in Subsection [(12)] (11)(a)(i) by:

(A) the percentage of property taxes collected for the five calendar years immediately preceding the current calendar year; and

(B) the prior year approved tax rate.

(b) If a taxing entity levied the prior year approved tax rate, the budgeted revenues determined under Subsection [(12)](11) (a) are reflected in the budgeted revenue column of the prior year Report 693.

[(13)](12) Entities required to set levies for more than one fund must compute an aggregate certified rate. The aggregate certified rate is the sum of the certified rates for individual funds for which separate levies are required by law. The aggregate certified rate computation applies where:

(a) the valuation bases for the funds are contained within identical geographic boundaries; and

(b) the funds are under the levy and budget setting authority of the same governmental entity.

[(14)](13) For purposes of determining the certified tax rate of a municipality incorporated on or after July 1, 1996, the levy imposed for municipal-type services or general county purposes shall be the certified tax rate for municipal-type services or general county purposes, as applicable.

[(15)](14) No new entity, including a new city, may have a certified tax rate or levy a tax for any particular year unless that entity existed on the first day of that calendar year.

2014 Valuation Guides for Valuation of Land Subject to the Farmland Assessment Act Pursuant to Utah Code Ann. Section 59-2-515

NOTICE OF PROPOSED RULE

(Amendment) DAR FILE NO.: 38904 FILED: 10/09/2014

RULE ANALYSIS

PURPOSE OF THE RULE OR REASON FOR THE CHANGE: This amendment annually updates the agricultural productive values to be applied by county assessors to land qualifying for valuation and assessment under the Farmland Assessment Act. The values are recommended to the Commission by the State Farmland Evaluation Advisory Committee, which meets under the authority of Section 59-2-514.

SUMMARY OF THE RULE OR CHANGE: Section 59-2-515 authorizes the State Tax Commission to promulgate rules regarding the Property Tax Act, Part 5, Farmland Assessment Act. Section 59-2-514 authorizes the State Tax Commission to receive valuation recommendations from the State Farmland Advisory Committee for implementation as outlined in Section R884-24P-53. The rule sets the acreage value rates for 418 separate class-county combinations.

STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS RULE: Section 59-2-515

ANTICIPATED COST OR SAVINGS TO:

◆ THE STATE BUDGET: The amount of savings or cost to state government is undetermined. The state receives tax revenue for assessing and collecting and for the Education Fund based on increased or decreased real and personal property valuation, including property assessed under the Farmland Assessment Act (FAA). Property valuation (taxable value) changes have been recommended by class and by county. This year it is proposed that 249 rates decrease slightly, 108 increase slightly and 61 have no change. No total cost or savings can be calculated without an exhaustive study of farmland acreage in each county by class and a listing of property newly qualifying or no longer qualifying for FAA in the coming year. However, it is estimated that the overall change is minimal due to this amendment.

◆ LOCAL GOVERNMENTS: The amount of saving or cost to local government is undetermined. Local governmental entities receive tax revenue based on increased or decreased property valuation, including property assessed under FAA. Property valuation changes have been recommended by class and by county. This year it is proposed that 249 rates decrease slightly, 108 increase slightly and 61 have no change. No total cost or savings can be calculated without an exhaustive study of farmland acreage in each county by class and a listing of property newly qualifying or no longer qualifying for FAA in the coming year. However, it is estimated that the overall change is minimal due to this amendment. County assessors' offices statewide will be required to input the new value indicators into their computer systems to be applied against the acreage for individual properties. This input process is easily accomplished on an annual basis and represents no significant cost in time or money to the assessors' offices.

◆ SMALL BUSINESSES: Each property owner with property eligible for assessment under FAA may see a change in value, depending on property class and situs county. The effect on the property owner will depend on the mix of property types and situs. No total cost or savings can be calculated without an exhaustive study of farmland acreage in each county by class and a listing of property newly qualifying or no longer qualifying for FAA in the coming year. In addition, the cost will be further altered by changes to local property tax rates. However, it is estimated that the overall change due to this amendment is minimal.

◆ PERSONS OTHER THAN SMALL BUSINESSES, BUSINESSES, OR LOCAL GOVERNMENTAL ENTITIES: Each property owner with property eligible for assessment under FAA may see a change in value, depending on property class and situs county. The effect on the property owner will depend on the mix of property types and situs. No total cost or savings can be calculated without an exhaustive study of farmland acreage in each county by class and a listing of property newly qualifying or no longer qualifying for FAA in the coming year. In addition, the cost will be further altered by changes to local property tax rates. However, it is estimated that the overall change due to this amendment is minimal.

COMPLIANCE COSTS FOR AFFECTED PERSONS: Each property owner with property eligible for assessment under FAA may see a change in value, depending on property class and situs county. The effect on the property owner will depend on the mix of property types and situs. No total cost or savings can be calculated without an exhaustive study of farmland acreage in each county by class and a listing of property newly qualifying or no longer qualifying for FAA in the coming year. In addition, the cost will be further altered by changes to local property tax rates. However, it is estimated that the overall change due to this amendment is minimal. COMMENTS BY THE DEPARTMENT HEAD ON THE FISCAL IMPACT THE RULE MAY HAVE ON BUSINESSES: These changes may affect property values which may result in a change of property tax amounts due.

Pregualification of Contractors

NOTICE OF PROPOSED RULE

(Amendment) DAR FILE NO.: 38912 FILED: 10/15/2014

RULE ANALYSIS

PURPOSE OF THE RULE OR REASON FOR THE CHANGE: The purpose of the amendment is to provide greater access to the Utah Department of Transportation (UDOT) procurements for small businesses by updating rule references, revising and adding definitions, changing the project advertised estimate threshold for which pregualification is required. adding and revising pregualification guidance and information, and providing joint venture guidance and information.

SUMMARY OF THE RULE OR CHANGE: This amendment: 1) updates references to the Utah Code Ann. Sections that the rule is authorized under; 2) updates and adds definitions; 3) changes the project advertised estimate threshold for which prequalification is required from \$1,500,000 or under to \$3,000,000 or under; 4) adds prequalification information submittal deadline; 5) authorizes the department to alter an applicant's status anytime during the process as needed; 6) eliminates requirement that federal income tax returns accompany reviewed financial statements; 7) defines the lower prequalification rating; 8) provides and defines an applicants ability to submit a guaranty of financial support; 9) limits information applicant must provide regarding experience and past performance; 10) eliminates the "Status of Work under Contract" form requirement; 11) defines conditions under which an application may be rejected; 12) provides notice that the department will not accept any pledges; 13) defines requirements for applying as a joint venture; and 14) repeals the disqualification rule.

STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS RULE: Section 72-1-201 and Subsection 63G-6a-106(3)(a)

ANTICIPATED COST OR SAVINGS TO:

◆ THE STATE BUDGET: The revised rule is intended to provide greater access to UDOT procurement contracts to small businesses. It does not increase or decrease fees, there will be no additional cost to administer the revised rule. The revised rule will not affect the state's budget.

◆ LOCAL GOVERNMENTS: The revised rule is intended to provide greater access to UDOT procurement contracts. The revised rule does not provide anything to or require anything from local governments, therefore it will not affect the budgets of local governments.

◆ SMALL BUSINESSES: Because the revised rule is intended to provide greater access to UDOT procurement contracts to small businesses it should provide non-fiscal benefits to small businesses. The revised rule does not increase or decrease fees and there will be no additional cost to administer the revised rule. The revised rule will have a positive effect on small businesses.

◆ PERSONS OTHER THAN SMALL BUSINESSES, BUSINESSES, OR LOCAL GOVERNMENTAL ENTITIES: Since the revised rule provides greater access to UDOT procurement contracts to small businesses it creates an incentive to start a small business and enter the market. Therefore, the revised rule will affect persons other than small businesses, businesses, or local government entities in a positive way.

COMPLIANCE COSTS FOR AFFECTED PERSONS: The revised rule requires no compliance fees of affected persons.

COMMENTS BY THE DEPARTMENT HEAD ON THE FISCAL IMPACT THE RULE MAY HAVE ON BUSINESSES: Director Braceras agrees with the assessment of the drafting attorney with respect to costs to affected persons.

R916. Transportation, Operations, Construction. **R916-2.** Prequalification of Contractors. **R916-2-1.** Authority and Purpose.

This rule establishes procedures for prequalifying[prequalification of] contractors desiring to submit bids and proposals [$\frac{\text{on}}{\text{for}}$ Utah Department of Transportation construction projects. This rule is authorized under Utah Code Ann. Sections 72-1-201[₅] and [$\frac{\text{Subsection}}{\text{Subsection}}$] 63G-6<u>a</u>-106(3)(a)[$\frac{207(3)}{3}$].

R916-2-2. Definitions.

(1) Terms used in this rule are defined in Section 72-1-102[-and Subsection 63G-6-207(3)].

(2) [In addition,]"[b]Board" means the prequalification board, consisting of 4 positions: Department of Transportation [e]Comptroller, [project development engineer]Director of Construction and Materials, an engineer for construction, and the [construction administrative secretary]Prequalification Specialist, or designees.

(3) "Applicant" means any person who submits an application for prequalification.

R916-2-3. Prequalification.

(1) Contractors desiring to submit bids or proposals for construction contracts shall be prequalified by the [d]Department to ensure they have the resources and capability to successfully complete awarded contracts. Prequalification [of contractors] is not required for [contracts]projects that have an advertised estimate of[under] [1,500,000]3,000,000 or under.

(a) Prequalification information is due at least 10 calendar days before submitting a proposal or bid on projects of more than \$3,000,000.

(b) The Department may change an Applicant's prequalification status at any time if the Department receives favorable or unfavorable information about the Applicant's job or financial performance.

(c) The prequalification amount limits the size of individual contracts and type of work for which a prequalified contractor may submit proposals or bids.

(2) Qualification ratings establish the type of construction work contractors may be permitted to perform and the maximum dollar value of contracts they are allowed to undertake at any one time.

(3) [Contractors]Applicants who attain a total prequalification of \$50,000,000 shall be classified as unlimited. Each [contractor]Applicant's prequalification shall be reviewed at least annually; more often if circumstances so warrant as determined by the Department.

(4) Qualification ratings shall be based on evaluation of the [contractor's]Applicant's:

(a) experience;

(b) past performance;

(c) personnel; and

([e]d) analysis of certified audited financial statements, including balance sheet, income statements, <u>equipment</u> and changes in financial condition.

([i]e) [R]reviewed financial statements [accompanied by the company federal income tax return] for the same time period may be accepted in lieu of the required certified audited financial statements, however, [this]providing these documents shall result in a lower prequalification rating of one-half of the financial factor allowed under the usual procedure.

(5) An applicant may submit a guaranty of financial support provided by an affiliated but independent entity. The Department shall provide a guarantee form for this purpose. Applicants must submit the Department's guarantee form with their applications. The guarantee may increase an applicant's adjusted equity by a maximum of 50% of the applicant's calculated adjusted equity in the formula.

([5]6) The applicant shall only provide the experience and past performance of the applicant, and must submit financial documents that accurately represent the past financial performance and present financial condition of the applicant. [Each bid proposal submitted shall include a complete "Status of Work Under Contraet". form. The form shall include all work presently the responsibility of said contractor, both in and out of the state of Utah.

(a) Contractors with a prequalification amount classified as unlimited are exempt from this requirement.]

(7) The Department may reject an application and not pre-qualify an Applicant if the Applicant:

(a) fails to provide all requested information;

(b) provides false, misleading, or incorrect information;

(c) has now or in the past had an officer, member or owner who was convicted of a felony;

(d) is now or has been suspended or debarred by any governmental entity;

(e) has failed to complete a construction contract as the prime contractor;

(f) has been convicted or held liable for any crime or civil offense that involved collusive or deceptive activity related to a procurement process; or

(g) otherwise fails to meet the Department's requirements.

([6]8) This rule shall be administered to ensure <u>that</u> <u>Applicants possess</u> adequate financial resources to provide complete performance of contracts awarded to them by the <u>Department</u>, and to foster and protect competition in [bidding for construction contracts]the Department's bidding processes.

(9) The Department will not accept any pledges.

R916-2-4 Joint Venture.

(1) Joint ventures must submit a letter of intent to the Department's Prequalification Board Specialist that states the exact name of the joint venture and identifies the joint venture's designated administrative partner before submitting a joint proposal on a project. Joint ventures must submit their joint proposals at least four working days before the scheduled bid opening. The Department will consolidate individual prequalification amounts for joint venture bids or proposals. (2) Applicants shall obtain the following under the joint. venture designation before bid openings:

(a) Bid bond; and

(b) UDOT Contractor identification and password.

R916-2-[4]5. Prequalification Board.

(1) The Prequalification board is established to:

(a) direct the prequalification of contractors;

(b) review and analyze prequalification applications; and

(c) establish the amount and type of prequalification to be granted to contractors.

[R916-2-5. Disqualification.

(1) If the board determines a contractor is not performing in a satisfactory manner on projects, the board may disqualify theeontractor from bidding on future projects for a period of time as the board may determine.

(2) If it is determined any contractor knowingly ornegligently falsifies their "Status of Work Under Contract," they may be disqualified from bidding on projects for a period of time as the board may determine.

NOTICES OF CHANGES IN PROPOSED RULES

After an agency has published a **P**ROPOSED **R**ULE in the *Utah State Bulletin*, it may receive comment that requires the **P**ROPOSED **R**ULE to be altered before it goes into effect. A **C**HANGE IN **P**ROPOSED **R**ULE allows an agency to respond to comments it receives.

As with a **P**ROPOSED **R**ULE, a **C**HANGE IN **P**ROPOSED **R**ULE is preceded by a **R**ULE **A**NALYSIS. This analysis provides summary information about the **C**HANGE IN **P**ROPOSED **R**ULE including the name of a contact person, anticipated cost impact of the rule, and legal cross-references.

While the law does not designate a comment period for a CHANGE IN PROPOSED RULE, it does provide for a 30-day waiting period. An agency may accept additional comments during this period and, at its option, may designate a comment period or may hold a public hearing. The 30-day waiting period for CHANGES IN PROPOSED RULES published in this issue of the Utah State Bulletin ends December 1, 2014.

Following the RULE ANALYSIS, the text of the CHANGE IN PROPOSED RULE is usually printed. The text shows only those changes made since the PROPOSED RULE was published in an earlier edition of the *Utah State Bulletin*. Additions made to the rule appear underlined (<u>example</u>). Deletions made to the rule appear struck out with brackets surrounding them ([<u>example</u>]). A row of dots in the text between paragraphs (.....) indicates that unaffected text, either whole sections or subsections, was removed to conserve space. If a CHANGE IN PROPOSED RULE is too long to print, the Division of Administrative Rules may include only the RULE ANALYSIS. A copy of rules that are too long to print is available from the agency or from the Division of Administrative Rules.

From the end of the 30-day waiting period through <u>March 1, 2015</u>, an agency may notify the Division of Administrative Rules that it wants to make the CHANGE IN PROPOSED RULE effective. When an agency submits a Notice of Effective Date for a CHANGE IN PROPOSED RULE, the PROPOSED RULE as amended by the CHANGE IN PROPOSED RULE becomes the effective rule. The agency sets the effective date. The date may be no fewer than 30 days nor more than 120 days after the publication date of the CHANGE IN PROPOSED RULE. If the agency designates a public comment period, the effective date may be no fewer than seven calendar days after the close of the public comment period nor more than 120 days after the publication date. Alternatively, the agency may file another CHANGE IN PROPOSED RULE in response to additional comments received. If the Division of Administrative Rules does not receive a Notice of Effective Date or another CHANGE IN PROPOSED RULE by the end of the 120-day period after publication, the CHANGE IN PROPOSED RULE filing, along with its associated PROPOSED RULE, lapses.

CHANGES IN PROPOSED RULES are governed by Section 63G-3-303, Rule R15-2, and Sections R15-4-3, R15-4-4, R15-4-5b, R15-4-7, R15-4-9, and R15-4-10.

RULE ANALYSIS

PURPOSE OF THE RULE OR REASON FOR THE CHANGE: The EPA has indicated its intention to approve the area source coatings rules for the PM2.5 State Implementation Plan as reasonable available control technology (RACT), but not until: 1) they are amended to clarify that the amount of control removal specified in each rule is based on the entire system, and 2) the inspection and recordkeeping requirements for these systems are expanded. These changes were proposed to this and 13 other air quality area source rules, and a 30-day public comment period was held. During the public comment period, several inquiries were made regarding why the rules do not permit the use of exempt solvents for cleaning. The definition of "volatile organic compound (VOC)" found in Section R307-101-2 incorporates the definition of VOC found in 40 CFR 51.100(s) (1). This definition does permit the use of exempt compounds for cleaning; however, this allowance is not explicitly stated in this or the other proposed area source rules. The change to the proposed rule is to specify that exempt compounds are not VOC by definition.

SUMMARY OF THE RULE OR CHANGE: The change clarifies that exempt compounds are not VOC by definition. (DAR NOTE: The original proposed amendment upon which this change in proposed rule (CPR) was based was published in the August 1, 2014, issue of the Utah State Bulletin, on page 8. Underlining in the rule below indicates text that has been added since the publication of the proposed rule mentioned above; strike-out indicates text that has been deleted. You must view the CPR and the proposed amendment together to understand all of the changes that will be enforceable should the agency make this rule effective.)

STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS RULE: Subsection 19-2-104(1)(a)

ANTICIPATED COST OR SAVINGS TO:

◆ THE STATE BUDGET: This change is to add clarifying language and does not change any of the rule requirements; therefore, there are no anticipated costs or savings to the state budget.

◆ LOCAL GOVERNMENTS: This change is to add clarifying language and does not change any of the rule requirements; therefore, there are no anticipated costs or savings to local government.

♦ SMALL BUSINESSES: This change is to add clarifying language and does not change any of the rule requirements; therefore, there are no anticipated costs or savings to small businesses.

◆ PERSONS OTHER THAN SMALL BUSINESSES, BUSINESSES, OR LOCAL GOVERNMENTAL ENTITIES: This change is to add clarifying language and does not change any of the rule requirements; therefore, there are no anticipated costs or savings to persons other than small businesses, businesses, or local government entities.

COMPLIANCE COSTS FOR AFFECTED PERSONS: This change is to add language to clarify that exempt compounds are not VOC by definition. This change does not result in any additional compliance costs.

COMMENTS BY THE DEPARTMENT HEAD ON THE FISCAL IMPACT THE RULE MAY HAVE ON BUSINESSES: This change is to add language to clarify that exempt compounds are not VOC by definition. This change will not have a fiscal impact on businesses.

AUTHORIZED BY: Bryce Bird, Director

R307. Environmental Quality, Air Quality. R307-335. Degreasing and Solvent Cleaning Operations. R307-335-1. Purpose.

The purpose of this rule is to limit volatile organic compound (VOC) emission from degreasing and solvent cleaning operations.

R307-335-2. Applicability.

R307-335 applies to all degreasing or solvent cleaning operations that use VOCs and that are located in PM10 and PM2.5 nonattainment and maintenance plan areas as defined in 40 CFR 81.345 (July 1, 2011).

R307-335-3. Definitions.

The following additional definitions apply to R307-335:

"Batch open top vapor degreasing" means the batch process of cleaning and removing grease and soils from metal surfaces by condensing hot solvent vapor on the colder metal parts. "Cold cleaning" means the batch process of cleaning and removing soils from metal surfaces by spraying, brushing, flushing or immersing while maintaining the solvent below its boiling point.

"Conveyorized degreasing" means the continuous process of cleaning and removing greases and soils from metal surfaces by using either cold or vaporized solvents.

"Department of Defense military technical data" means a specification that specifies design requirements, such as materials to be used, how a requirement is to be achieved, or how an item is to be fabricated or constructed.

"Freeboard ratio" means the freeboard height (distance between solvent line and top of container)divided by the width of the degreaser.

"Industrial solvent cleaning" means operations performed using a liquid that contains any VOC, or combination of VOCs, which is used to clean parts, tools, machinery, equipment and work areas. Cleaning operations include, but are not limited to, spraying, wiping, flushing, and purging.

"Open top vapor degreaser" means the batch process of cleaning and removing soils from metal surfaces by condensing low solvent vapor on the colder metal parts.

"Separation operation" means any process that separates a mixture of compounds and solvents into two or more components. Specific mechanisms include extraction, centrifugation, filtration, and crystallization.

"Solvent metal cleaning" means the process of cleaning soils from metal surfaces by cold cleaning, open top vapor degreasers, or conveyorized degreasing.

R307-335-4. Cold Cleaning Facilities.

No owner or operator shall operate a degreasing or solvent cleaning operation unless conditions in R307-335-4(1) through (7) are met.

(1) A cover shall be installed which shall remain closed except during actual loading, unloading or handling of parts in cleaner. The cover shall be designed so that it can be easily operated with one hand if:

(a) The volatility of the solvent is greater than 2 kPa (15 mm Hg or 0.3 psi) measured at 38 degrees C (100 degrees F),

(b) The solvent is agitated, or

(c) The solvent is heated.

(2) An internal draining rack for cleaned parts shall be installed on which parts shall be drained until all dripping ceases. If the volatility of the solvent is greater than 4.3 kPa (32 mm Hg at 38 degrees C (100 degrees F)), the drainage facility must be internal, so that parts are enclosed under the cover while draining. The drainage facility may be external for applications where an internal type cannot fit into the cleaning system.

(3) Waste or used solvent shall be stored in covered containers.

(4) Tanks, containers and all associated equipment shall be maintained in good operating condition, and leaks shall be repaired immediately or the degreaser shall be shutdown.

(5) Written procedures for the operation and maintenance of the degreasing or solvent cleaning equipment shall be permanently posted in an accessible and conspicuous location near the equipment.

(6) If the solvent volatility is greater than 4.3 kPa (33 mm Hg or 0.6 psi) measured at 38 degrees C (100 degrees F), or if solvent

is heated above 50 degrees C (120 degrees F), then one of the following control devices shall be used:

(a) Freeboard that gives a freeboard ratio greater than 0.7;

(b) Water cover if the solvent is insoluble in and heavier than water); or

(c) Other systems of equivalent control, such as a refrigerated chiller or carbon adsorption.

(7) If used, the solvent spray shall be a solid fluid stream at a pressure that does not cause excessive splashing and may not be a fine, atomized or shower type spray.

R307-335-5. Open Top Vapor Degreasers.

Owners or operators of open top vapor degreasers shall, in addition to meeting the requirements of R307-335-4(3), (4) and (5),

(1) Equip the vapor degreaser with a cover that can be opened and closed without disturbing the vapor zone. The cover shall be closed except when processing work loads through the degreaser;

(2) Install one of the following control devices:

(a) Equipment necessary to sustain:

(i) A freeboard ratio greater than or equal to 0.75, and

(ii) A powered cover if the degreaser opening is greater than 1 square meter (10.8 square feet),

(b) Refrigerated chiller,

(c) Enclosed design (cover or door opens only when the dry part is actually entering or exiting the degreaser),

(d) Carbon adsorption system, with ventilation greater than or equal to 15 cubic meters per minute per square meter (50 cubic feet per minute per square foot) of air/vapor area when cover is open and exhausting less than 25 parts per million of solvent averaged over one complete adsorption cycle;

(3) Minimize solvent carryout by:

(a) Racking parts to allow complete drainage,

(b) Moving parts in and out of the degreaser at less than 3.3 meters per minute (11 feet per minute),

(c) Holding the parts in the vapor zone at least 30 seconds or until condensation ceases,

(d) Tipping out any pool of solvent on the cleaned parts before removal, and

(e) Allowing the parts to dry within the degreaser for at least 15 seconds or until visibly dry.

(4) Spray parts only in or below the vapor level;

(5) Not use ventilation fans near the degreaser opening, nor provide exhaust ventilation exceeding 20 cubic meters per minute per square meter (65 cubic feet per minute per square foot) in degreaser open area, unless necessary to meet state and federal occupational, health, and safety requirements.

(6) Not degrease porous or absorbent materials, such as cloth, leather, wood or rope;

(7) Not allow work loads to occupy more than half of the degreaser's open top area;

(8) Ensure that solvent is not visually detectable in water exiting the water separator;

(9) Install safety switches on the following:

(a) Condenser flow switch and thermostat (shuts off sump heat if condenser coolant is either not circulating or too warm); and

(b) Spray switch (shuts off spray pump if the vapor level drops excessively, i.e., greater than 10 cm (4 inches).

(10) Open top vapor degreasers with an open area smaller than one square meter (10.8 square feet) are exempt from R307-335-5(2)(b) and (d).

R307-335-6. Conveyorized Degreasers.

Owners and operators of conveyorized degreasers shall, in addition to meeting the requirements of R307-335-4(3), (4) and (5) and R307-335-5(5):

(1) Install one of the following control devices for conveyorized degreasers with an air/vapor interface equal to or greater than two square meters (21.5 square feet):

(a) Refrigerated chiller; or

(b) Carbon adsorption system, with ventilation greater than or equal to 15 cubic meters per minute per square meter (50 cubic feet per minute per square foot) of air/vapor area when downtime covers are open, and exhausting less than 25 parts per million of solvent, by volume, averaged over a complete adsorption cycle.

(2) Equip the cleaner with equipment, such as a drying tunnel or rotating (tumbling) basket, sufficient to prevent cleaned parts from carrying out solvent liquid or vapor.

(3) Provide downtime covers for closing off the entrance and exit during shutdown hours. Ensure that down-time cover is placed over entrances and exits of conveyorized degreasers immediately after the conveyor and exhaust are shut down and is removed just before they are started up.

(4) Minimize carryout emissions by racking parts for best drainage and maintaining the vertical conveyor speed at less than 3.3 meters per minute (11 feet per minute).

(5) Minimize openings: Entrances and exits should silhouette work loads so that the average clearance (between parts and the edge of the degreaser opening) is either less than 10 cm (4 inches) or less than 10% of the width of the opening.

(6) Install safety switches on the following:

(a) Condenser flow switch and thermostat - shuts off sump heat if coolant is either not circulating or too warm;

(b) Spray switch - shuts off spray pump or conveyor if the vapor level drops excessively, i.e., greater than 10 cm or (4 inches); and

(c) Vapor level control thermostat - shuts off sump level if vapor level rises too high.

(7) Ensure that solvent is not visibly detectable in the water exiting the water separator.

R307-335-7. Industrial Solvent Cleaning.

(1) Exemptions. The requirements of R307-335-7 do not apply to aerospace, wood furniture, shipbuilding and repair, flat wood paneling, large appliance, metal furniture, paper film and foil, plastic parts, miscellaneous metal parts coatings and light autobody and truck assembly coatings, flexible packaging, lithographic and letterpress printing materials, fiberglass boat manufacturing materials, and operations that are exclusively covered by Department of Defense military technical data and performed by a Department of Defense contractor and/or on site at installations owned and/or operated by the United States Armed Forces.

(2) Operators of industrial solvent cleaning that emit 15 pounds of VOCs or more per day from industrial solvent cleaning operations, shall reduce VOC emissions from the use, handling, storage, and disposal of cleaning solvents and shop towels by implementing the following work practices:

(a) Covering open containers; and

(b) Storing used applicators and shop towels in closed fire proof containers, and

(c) Limiting VOC emissions by either:

(i) Using solvents (excluding water and solvents exempt from the definition of volatile organic compounds found in R307-101-2) with a VOC limit in Table 1; or

(ii) Installing an emission control system designed to have an overall capture and control efficiency of at least 85%.

•••••

R307-335-8. Add-on Emission Control Systems Operations.

(1) Determination of overall capture and control efficiency shall be determined using EPA approved methods, as follows.

(a) The capture efficiency of a VOC emission control system's VOC collection device shall be determined according to EPA's "Guidelines for Determining Capture Efficiency," January 9, 1995 and 40 CFR Part 51, Appendix M, Methods 204-204F, as applicable.

(b) The control efficiency of a VOC emission control system's VOC control device shall be determined using test methods in Appendices A-1, A-6, and A-7 to 40 CFR Part 60, for measuring flow rates, total gaseous organic concentrations, or emissions of exempt compounds, as applicable.

(c) An alternative test method may be substituted for the preceding test methods after review and approval by the EPA Administrator.

(2) The owner or operator of a control system shall provide documentation that the emission control system will attain the requirements of R307-335-7(2)(c)(ii).

(3) The owner or operator shall maintain records of key system parameters necessary to ensure compliance with R307-335-7. Key system parameters may include, but are not limited to, temperature, pressure and flow rates. Operator inspection schedule, monitoring, recordkeeping, and key parameters shall be in accordance with the manufacturer's recommendations, and as required to demonstrate operations are providing continuous emission reduction from the source during all periods that the operations cause emissions from the source.

(4) The owner or operator shall maintain for a minimum of two years records of operating and maintenance sufficient to demonstrate that the equipment is being operated and maintained in accordance with the manufacturer recommendations.

RULE ANALYSIS

PURPOSE OF THE RULE OR REASON FOR THE CHANGE: The EPA has indicated its intention to approve the area source coatings rules for the PM2.5 State Implementation Plan as reasonable available control technology (RACT), but not until: 1) they are amended to clarify that the amount of control removal specified in each rule is based on the entire system, and 2) the inspection and recordkeeping requirements for these systems are expanded. These changes were proposed to this and 13 other air quality area source rules, and a 30-day public comment period was held. During the public comment period, several inquiries were made regarding why the rules do not permit the use of exempt solvents for cleaning. The definition of "volatile organic compound (VOC)" found in Section R307-101-2 incorporates the definition of VOC found in 40 CFR 51.100(s) (1). This definition does permit the use of exempt compounds for cleaning; however, this allowance is not explicitly stated in this or the other proposed area source rules. The change to the proposed rule is to specify that exempt compounds are not VOC by definition.

SUMMARY OF THE RULE OR CHANGE: The change clarifies that exempt compounds are not VOC by definition. (DAR NOTE: The original proposed amendment upon which this change in proposed rule (CPR) was based was published in the August 1, 2014, issue of the Utah State Bulletin, on page 11. Underlining in the rule below indicates text that has been added since the publication of the proposed rule mentioned above; strike-out indicates text that has been deleted. You must view the CPR and the proposed amendment together to understand all of the changes that will be enforceable should the agency make this rule effective.)

R307. Environmental Quality, Air Quality. R307-343. Emissions Standards for Wood Furniture Manufacturing Operations. R307-343-1. Purpose.

The purpose of R307-343 is to limit volatile organic compound (VOC) emissions from wood furniture manufacturing.

R307-343-2. Applicability.

R307-343 applies to wood furniture manufacturing operations, including related cleaning activities, that have the potential to emit 2.7 tons or more per year of VOCs and that are located in Box Elder, Cache, Davis, Salt Lake, Utah, Tooele, and Weber counties.

R307-343-3. Definitions.

The following additional definitions apply to R307-343:

"Affected source" means a wood furniture manufacturing source that meets the criteria in R307-343-2.

"As applied" means the volatile organic compound and solids content of the finishing material that is actually used for coating the substrate. It includes the contribution of materials used for inhouse dilution of the finishing material.

"Coating" means a protective, decorative, or functional material applied in a thin layer to a surface. Such materials may include paints, topcoats, varnishes, sealers, stains, washcoats, basecoats, inks, and temporary protective coatings.

"Compliant coating" means a finishing material or strippable booth coating that meets the emission limits specified in R307-343-4(1).

"Control system" means the combination of capture and control devices used to reduce emissions to the atmosphere.

"Conventional Air Spray" means a spray coating method in which the coating is atomized by mixing it with compressed air at an air pressure greater than ten pounds per square inch (gauge) at the point of atomization. Airless, air assisted airless spray technologies, and electrostatic spray technology are not considered conventional air spray.

"Finishing material" means a coating used in the wood furniture industry, including basecoats, stains, washcoats, sealers, and topcoats.

"Finishing Operation" means those activities in which a finishing material is applied to a substrate and is subsequently airdried, cured in an oven, or cured by radiation.

"Sealer" means a finishing material used to seal the pores of a wood substrate before additional coats of finishing material are applied. A washcoat used to optimize aesthetics is not a sealer.

"Solids" means the part of the coating that remains after the coating is dried or cured; solids content is determined using data from EPA Method 24.

"Stain" means any color coat having a solids content by weight of no more than 8.0% that is applied in single or multiple coats

directly to the substrate, including nongrain raising stains, equalizer stains, sap stains, body stains, no-wipe stains, penetrating stains, and toners.

"Topcoat" means the last film-building finishing material applied in a finishing system. Non-permanent final finishes are not topcoats.

"Touch-up and Repair" means the application of finishing materials to cover minor finishing imperfections.

"Washcoat" means a transparent special purpose coating having a solids content by weight of 12.0% or less that is applied over initial stains to protect and control color and to stiffen the wood fibers in order to aid sanding.

"Washoff operations" means those operations in which organic solvent is used to remove coating from a substrate.

"Wood furniture" means any product made of wood, a wood product such as rattan or wicker, or an engineered wood product such as particleboard that is manufactured under any of the following standard industrial classification codes: 2434, 2511, 2512, 2517, 2519, 2521, 2531, 2541, 2599, or 5712.

R307-343-4. VOC Content Limits.

(1) Each affected source subject to R307-343 shall limit VOC emissions by:

(a) Using the compliant coating method as described in R307-343-4(1)(a)(i) or using the control system method as described in R307-343-4(1)(a)(ii).

(i) Compliant coating method is the use of the topcoats or topcoat/sealer combinations in Table 1:

TABLE 1

(ii) Control system method is the use of a VOC control system achieving a 85% or greater emissions reduction.

(b) Using strippable spray booth coatings that contain no greater than 0.8 pounds VOC per pound solids as applied.

(c) Using closed containers for the storing of finishing, gluing, cleaning and washoff materials.

R307-343-5. Application Equipment Requirements.

(1) All coatings shall be applied using equipment having a minimum 65% transfer efficiency, except as allowed under R307-343-5(3) and operated according to the equipment manufacturer specifications. Equipment meeting the transfer efficiency requirement includes:

(a) Brush, dip, or roll coating;

(b) Electrostatic application; and

(c) High volume, low pressure (HVLP) spray equipment.

(2) Other coating application methods that achieve transfer efficiency equivalent to HVLP or electrostatic spray application methods may be used.

(3) Conventional air spray methods may be used under the following circumstances:

(a) To apply finishing materials that have no greater than 1.0 pound of VOC per pound of solids, as applied;

(b) For touch-up and repair under the following circumstances:

(i) The touchup and repair occurs after completion of the finishing operation; or

(ii) The touchup and repair occurs after the application of stain and before the application of any other type of finishing material, and the materials used for touchup and repair are applied from a container that has a volume of no more than 2.0 gallons;

(c) When the spray gun is aimed and triggered automatically, not manually;

(d) When the emissions from the finishing application station are directed to a control device;

(e) When the conventional air gun is used to apply finishing materials and the cumulative total usage of that finishing material is no more than 10% of the total gallons of finishing material used during the calendar year; or

(f) When the conventional air gun is used to apply stain on a part for which it is technically or economically infeasible to use any other spray application technology. The following criteria shall be used, either independently or in combination, to support the affected source's claim of technical or economic infeasibility:

(i) The production speed is too high or the part shape is too complex for one operator to coat the part and the application station is not large enough to accommodate an additional operator; or

(ii) The excessively large vertical spray area of the part makes it difficult to avoid sagging or runs in the stain.

R307-343-6. Add-on Controls Systems Operations.

(1) The owner or operator shall install and maintain an incinerator, carbon adsorption, or any other add-on emission control system, provided that the emission control system is operated and maintained in accordance with the manufacturer recommendations in order to maintain at least 85% capture and control efficiency. Determination of overall capture and control efficiency shall be determined using EPA approved methods, as follows.

(a) The capture efficiency of a VOC emission control system's VOC collection device shall be determined according to EPA's "Guidelines for Determining Capture Efficiency," January 9, 1995 and 40 CFR Part 51, Appendix M, Methods 204-204F, as applicable.

(b) The control efficiency of a VOC emission control system's VOC control device shall be determined using test methods in Appendices A-1, A-6, and A-7 to 40 CFR Part 60, for measuring flow rates, total gaseous organic concentrations, or emissions of exempt compounds, as applicable.

R307. Environmental Quality, Air Quality. R307-344. Paper, Film, and Foil Coatings. R307-344-1. Purpose.

The purpose of this rule is to limit volatile organic compound (VOC) emissions from roll, knife, and rotogravure coaters and drying ovens of paper, film, and foil coating operations.

R307-344-2. Applicability.

R307-344 applies to sources located in Box Elder, Cache, Davis, Salt Lake, Tooele, Utah and Weber counties that have the potential to emit 2.7 tons per year or more of VOC, including related cleaning activities.

R307-344-3. Definitions.

The following additional definitions apply to R307-344:

"Coating" means a protective, functional, or decorative film applied in a thin layer to a surface. This term often applies to paints such as lacquers or enamels. It is also used to refer to films applied to paper, plastics, or foil.

"Foil coating" means a coating applied in a web coating process on any foil substrate other than paper or fabric, including, but not limited to, typewriter ribbons, photographic film, magnetic tape, and metal foil gift wrap, but excluding coatings applied to packaging used exclusively for food and health care products for human and animal consumption.

"Knife coating" means the application of a coating material to a substrate by means of drawing the substrate beneath a blade that spreads the coating evenly over the width of the substrate.

"Paper coating" means uniform distribution of coatings put on paper, film, foils and pressure sensitive tapes regardless of substrate. Related web coating processes on plastic film and decorative coatings on metal foil are included in this definition. Paper coating covers saturation operations as well as coating operations.

"Roll coating" means the application of a coating material to a substrate by means of hard rubber or steel rolls.

"Roll printing" means the application of words, designs and pictures to a substrate usually by means of a series of hard rubber or steel rolls each with only partial coverage.

"Rotogravure coating" means the application of a uniform layer of material across the entire width of the web to substrate by means of a roll coating technique in which the pattern to be applied is etched on the coating roll. The coating material is picked up in these recessed areas and is transferred to the substrate.

"Saturation" means dipping the web into a bath.

"Web" means a continuous sheet of substrate.

R307-344-4. VOC Content Limits.

Each owner or operator shall not apply coatings with a VOC content in excess of the amounts specified in Table 1 or shall use an add-on control device as specified in R307-344-6.

RULE ANALYSIS

PURPOSE OF THE RULE OR REASON FOR THE CHANGE: The EPA has indicated its intention to approve the area source coatings rules for the PM2.5 State Implementation Plan as reasonable available control technology (RACT), but not until: 1) they are amended to clarify that the amount of control removal specified in each rule is based on the entire system, and 2) the inspection and recordkeeping requirements for these systems are expanded. These changes were proposed to this and 13 other air quality area source rules, and a 30-day public comment period was held. The definition of "volatile organic compound (VOC)" found in Section R307-101-2 incorporates the definition of VOC found in 40 CFR 51.100(s) (1). This definition does permit the use of exempt compounds for cleaning; however, this allowance is not explicitly stated in this or the other proposed area source rules. The change to the proposed rule is to specify that exempt compounds are not VOC by definition.

SUMMARY OF THE RULE OR CHANGE: The change clarifies that exempt compounds are not VOC by definition. NOTICE OF CHANGE IN PROPOSED RULE

DAR FILE NO.: 38680 FILED: 10/07/2014

RULE ANALYSIS

PURPOSE OF THE RULE OR REASON FOR THE CHANGE: The EPA has indicated its intention to approve the area source coatings rules for the PM2.5 State Implementation Plan as reasonable available control technology (RACT), but not until: 1) they are amended to clarify that the amount of control removal specified in each rule is based on the entire system, and 2) the inspection and recordkeeping requirements for these systems are expanded. These changes were proposed to this and 13 other air quality area source rules, and a 30-day public comment period was held. During the public comment period, several inquiries were made regarding why the rules do not permit the use of exempt solvents for cleaning. The definition of "volatile

organic compound (VOC)" found in Section R307-101-2 incorporates the definition of VOC found in 40 CFR 51.100(s) (1). This definition does permit the use of exempt compounds for cleaning; however, this allowance is not explicitly stated in this or the other proposed area source rules. The change to the proposed rule is to specify that exempt compounds are not VOC by definition.

SUMMARY OF THE RULE OR CHANGE: The change clarifies that exempt compounds are not VOC by definition. (DAR NOTE: The original proposed amendment upon which this change in proposed rule (CPR) was based was published in the August 1, 2014, issue of the Utah State Bulletin, on page 26. Underlining in the rule below indicates text that has been added since the publication of the proposed rule mentioned above; strike-out indicates text that has been deleted. You must view the CPR and the proposed amendment together to understand all of the changes that will be enforceable should the agency make this rule effective.)

R307-349-2. Applicability.

R307-349 applies to sources located in Box Elder, Cache, Davis, Salt Lake, Tooele, Utah and Weber counties that have the potential to emit 2.7 tons per year or more of VOC, including related cleaning activities.

R307-349-3. Definitions.

The following additional definitions apply to R307-349:

"Coating" means a protective, decorative, or functional material applied in a thin layer to a surface. Such materials may include paints, topcoats, varnishes, sealers, stains, washcoats, basecoats, inks, and temporary protective coatings.

Metal Container, Closure, and Coil Coatings

NOTICE OF CHANGE IN PROPOSED RULE DAR FILE NO.: 38684 FILED: 10/07/2014

RULE ANALYSIS

PURPOSE OF THE RULE OR REASON FOR THE CHANGE: The EPA has indicated its intention to approve the area source coatings rules for the PM2.5 State Implementation Plan as reasonable available control technology (RACT), but not until: 1) they are amended to clarify that the amount of control removal specified in each rule is based on the entire system, and 2) the inspection and recordkeeping requirements for these systems are expanded.

These changes were proposed to this and 13 other air quality area source rules, and a 30-day public comment period was held. During the public comment period, several inquiries were made regarding why the rules do not permit the use of exempt solvents for cleaning. The definition of "volatile organic compound (VOC)" found in Section R307-101-2 incorporates the definition of VOC found in 40 CFR 51.100(s) (1). This definition does permit the use of exempt compounds for cleaning; however, this allowance is not explicitly stated in this or the other proposed area source rules. The change to the proposed rule is to specify that exempt compounds are not VOC by definition.

SUMMARY OF THE RULE OR CHANGE: The change clarifies that exempt compounds are not VOC by definition. (DAR NOTE: The original proposed amendment upon which this change in proposed rule (CPR) was based was published in the August 1, 2014, issue of the Utah State Bulletin, on page 36. Underlining in the rule below indicates text that has been added since the publication of the proposed rule mentioned above; strike-out indicates text that has been deleted. You must view the CPR and the proposed amendment together to understand all of the changes that will be enforceable should the agency make this rule effective.)

Automotive Refinishing Coatings

NOTICE OF CHANGE IN PROPOSED RULE

DAR FILE NO.: 38686

FILED: 10/07/2014

RULE ANALYSIS

PURPOSE OF THE RULE OR REASON FOR THE CHANGE: The EPA has indicated its intention to approve the area source coatings rules for the PM2.5 State Implementation Plan as reasonable available control technology (RACT), but not until: 1) they are amended to clarify that the amount of control removal specified in each rule is based on the entire system, and 2) the inspection and recordkeeping requirements for these systems are expanded.

These changes were proposed to this and 13 other air quality area source rules, and a 30-day public comment period was held. During the public comment period, several inquiries were made regarding why the rules do not permit the use of exempt solvents for cleaning. The definition of "volatile organic compound (VOC)" found in Section R307-101-2 incorporates the definition of VOC found in 40 CFR 51.100(s) (1). This definition does permit the use of exempt compounds for cleaning; however, this allowance is not explicitly stated in this or the other proposed area source rules. The change to the proposed rule is to specify that exempt compounds are not VOC by definition. Additionally, a question was raised regarding an apparent conflict in Rules R307-357 and R307-354.

SUMMARY OF THE RULE OR CHANGE: The changes clarify that exempt compounds are not VOC by definition and that automotive spray gun solvent cleaners that are defined as a "consumer product" under Rule R307-357 are exempt from the vapor pressure requirement and are regulated under Rule R307-357. (DAR NOTE: The original proposed amendment upon which this change in proposed rule (CPR) was based was published in the August 1, 2014, issue of the Utah State Bulletin, on page 42. Underlining in the rule below indicates text that has been added since the publication of the proposed rule mentioned above; strike-out indicates text that has been deleted. You must view the CPR and the proposed amendment together to understand all of the changes that will be enforceable should the agency make this rule effective.)

STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS RULE: Subsection 19-2-104(1)(a)

ANTICIPATED COST OR SAVINGS TO:

◆ THE STATE BUDGET: This change is to add clarifying language and does not change any of the rule requirements; therefore, there are no anticipated costs or savings to the state budget.

◆ LOCAL GOVERNMENTS: This change is to add clarifying language and does not change any of the rule requirements; therefore, there are no anticipated costs or savings to local government.

◆ SMALL BUSINESSES: This change is to add clarifying language and does not change any of the rule requirements; therefore, there are no anticipated costs or savings to small businesses.

◆ PERSONS OTHER THAN SMALL BUSINESSES, BUSINESSES, OR LOCAL GOVERNMENTAL ENTITIES: This change is to add clarifying language and does not change any of the rule requirements; therefore, there are no anticipated costs or savings to persons other than small businesses, businesses, or local government entities.

COMPLIANCE COSTS FOR AFFECTED PERSONS: This change is to add language to clarify that exempt compounds are not VOC by definition and that automotive spray gun solvent cleaners that are defined as a "consumer product" under Rule R307-357 are exempt from the vapor pressure

requirement and are regulated under Rule R307-357. This change does not result in any additional compliance costs.

COMMENTS BY THE DEPARTMENT HEAD ON THE FISCAL IMPACT THE RULE MAY HAVE ON BUSINESSES: This change is to add language to clarify that exempt compounds are not VOC by definition and that automotive spray gun solvent cleaners that are defined as a "consumer product" under Rule R307-357 are exempt from the vapor pressure requirement and are regulated under Rule R307-357. This change should not have a fiscal impact on businesses.

R307. Environmental Quality, Air Quality. R307-354. Automotive Refinishing Coatings. R307-354-1. Purpose.

The purpose of R307-354 is to limit volatile organic compound emissions (VOC) from automotive refinishing sources.

R307-354-2. Applicability.

(1) R307-354 applies to sources located in Box Elder, Cache, Davis, Salt Lake, Tooele, Utah and Weber counties that have the potential to emit 2.7 tons per year or more of VOC, including related cleaning activities.

(2) The requirements of R307-354 shall not apply to any canned aerosol coating products.

R307-354-3. Definitions.

The following additional definitions apply to R307-354:

"Adhesion promoter" means a coating which is labeled and formulated to be applied to uncoated plastic surfaces to facilitate bonding of subsequent coatings, and on which, a subsequent coating is applied.

"Automotive" means passenger cars, vans, motorcycles, trucks, buses, golf carts and all other mobile equipment.

"Automotive refinishing" means the process of coating automobiles, after-market automobiles, motorcycles, light and medium-duty trucks and vans that are performed in auto body shops, auto repair shops, production paint shops, new car dealer repair and paint shops, fleet operation repair and paint shops, and any other facility which coats vehicles under the Standard Industrial Classification Code 7532 (Top, Body and Upholstery Repair Shops and Paint Shops). This includes dealer repair of vehicles damaged in transit. It does not include refinishing operations for other types of mobile equipment, such as farm machinery and construction equipment or their parts, including partial body collision repairs, that is subsequent to the original coating applied at an automobile original equipment manufacturing plant.

"Clear coating" means any coating that contains no pigments and is labeled and formulated for application over a color coating or clear coating.

"Coating" means a protective, decorative, or functional material applied in a thin layer to a surface. Such materials may include paints, topcoats, varnishes, sealers, stains, washcoats, basecoats, inks, and temporary protective coatings.

"Color coating" means any pigmented coating, excluding adhesion promoters, primers, and multi-color coatings, that requires a subsequent clear coating and which is applied over a primer, adhesion promoter, or color coating. Color coatings include metallic and iridescent color coatings.

"Enclosed paint gun cleaner" means a cleaner consisting of a closed container with a door or top that can be opened and closed and fitted with cleaning connections. The spray gun is attached to a connection, and solvent is pumped through the gun and onto the exterior of the gun. Cleaning solvent falls back into the cleaner's solvent reservoir for recirculation.

"Metallic/Iridescent color coating" means a coating which contains iridescent particles, composed of either metal as metallic particles or silicon as mica particles, in excess of 0.042 pounds per gallon as applied, where such particles are visible in the dried film.

"Multi-color coating" means a coating which exhibits more than one color when applied, and which is packaged in a single container and applied in a single coat.

"Non-enclosed paint gun cleaner" means cleaner consisting of a basin similar to a sink in which the operator washes the outside of the gun under a solvent stream. The gun cup is filled with recirculated solvent, the gun tip is placed into a canister attached to the basin, and suction draws the solvent from the cup through the gun. The solvent gravitates to the bottom of the basin and drains through a small hole to a reservoir that supplies solvent to the recirculation pump.

"Pretreatment coating" means a coating which contains no more that 16% solids, by weight, and at least 0.5% acid, by weight, is used to provide surface etching, and is applied directly to bare metal surfaces to provide corrosion resistance and promote adhesion for subsequent coatings.

"Primer" means any coating which is labeled and formulated for application to a substrate to provide a bond between the substrate and subsequent coats; corrosion resistance; a smooth substrate surface; or resistance to penetration of subsequent coats, and on which a subsequent coating is applied. Primers may be pigmented.

"Single-stage coating" means any pigmented coating, excluding primers and multi-color coatings, labeled and formulated for application without a subsequent clear coat. Single-stage coatings include single-stage metallic/iridescent coatings.

"Solids" means the part of the coating that remains after the coating is dried or cured; solids content is determined using data from EPA Method 24.

"Temporary protective coating" means any coating which is labeled and formulated for the purpose of temporarily protecting areas form overspray or mechanical damage.

"Topcoat" means any coating or series of coatings applied over a primer or an existing finish for the purpose of protection or beautification.

"Truck bed liner coating" means any coating, excluding clear, color, multi-color, and single-stage coatings, labeled and formulated for application to a truck bed to protect it from surface abrasion.

"Underbody coating" means any coating labeled and formulated for application to wheel wells, the inside of door panels or fenders, the underside of a trunk or hood, or the underside of the motor vehicle.

"Uniform finish coating" means any coating labeled and formulated for application to the area around a spot repair for the purpose of blending a repaired area's color or clear coat to match the appearance of an adjacent area's existing coating. Prior to May 1, 2013, this coating category may be referred to as uniform finish blenders.

"Uniform finish blender" means a coating designed to blend a repaired topcoat into an existing topcoat.

R307-354-4. VOC Content Limits.

Each owner or operator shall not apply coatings with a VOC content in excess of the amounts specified in Table 1 or shall use an add-on control device as specified in R307-354-6.

R307-355-3. Exemptions.

(1) R307-355 does not apply:

(a) Where cleaning and coating takes place in research and development, quality control, laboratory testing and electronic parts and assemblies, except for cleaning and coating of completed assemblies;

(a) All <u>crude oil</u>, <u>condensate</u>, <u>and</u> intermediate hydrocarbon liquids collection, storage, processing and handling operations, regardless of size, shall be designed, operated and maintained so as to minimize emission of volatile organic compounds to the atmosphere to the extent reasonably practicable.

(b) At all times, including periods of start-up, shutdown, and malfunction, the installation and air pollution control equipment shall be maintained and operated in a manner consistent with good air pollution control practices for minimizing emissions.

(c) Determination of whether or not acceptable operating and maintenance procedures are being used will be based on information available to the director, which may include, but is not limited to, monitoring results, infrared camera images, opacity observations, review of operating and maintenance procedures, and inspection of the source.

(2) General requirements for air pollution control equipment.

(a) All air pollution control equipment shall be operated and maintained pursuant to the manufacturing specifications or equivalent to the extent practicable and consistent with technological limitations and good engineering and maintenance practices.

(b) The owner or operator shall keep manufacturer specifications or equivalent on file.

(c) In addition, all such air pollution control equipment shall be adequately designed and sized to achieve the control efficiency rates established in rules or in approval orders issued under R307-401 and to handle reasonably foreseeable fluctuations in emissions of VOCs during normal operations. Fluctuations in emissions that occur when the separator dumps into the tank are reasonably foreseeable.

Environmental Quality, Air Quality R307-502

Oil and Gas Industry: Pneumatic Controllers

NOTICE OF CHANGE IN PROPOSED RULE

DAR FILE NO.: 38580 FILED: 10/07/2014

RULE ANALYSIS

PURPOSE OF THE RULE OR REASON FOR THE CHANGE: The Utah Air Quality Board proposed this new rule, R307-502, for public comment on 06/04/2014. A 30-day public comment period was held, during which the Division of Air Quality (DAQ) received comments that resulted in changes being made to the originally proposed rule. The comments made by the Western Energy Alliance and the Utah Petroleum association raised concerns regarding adopting the NSPS standards in their entirety.

SUMMARY OF THE RULE OR CHANGE: Section R307-502-5 is modified to mirror the NSPS requirements to report high-bleed controllers that could not be replaced rather than reporting all controllers that were replaced. This is consistent with the intent of the rule to accelerate implementation of the requirements rather than establishing NSPS new requirements for pneumatic devices. (DAR NOTE: The original proposed new rule upon which this change in proposed rule (CPR) was based was published in the July 1, 2014, issue of the Utah State Bulletin, on page 40. Underlining in the rule below indicates text that has been added since the publication of the proposed new rule mentioned above; strike-out indicates text that has been deleted. You must view the CPR and the proposed new rule together to understand all of the changes that will be enforceable should the agency make this rule effective.)

STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS RULE: Subsection 12-2-104(1)(a)

ANTICIPATED COST OR SAVINGS TO:

◆ THE STATE BUDGET: The change in the rule to require the reporting of high-bleed controllers that could not be replaced rather than the reporting of all controllers there were replaced does not place any additional requirements on the state; therefore, there are no anticipated costs or savings to the state budget.

◆ LOCAL GOVERNMENTS: The change in the rule to require the reporting of high-bleed controllers that could not be replaced rather than the reporting of all controllers there were replaced does not place any additional requirements on local government; therefore, there are no anticipated costs or savings.

SMALL BUSINESSES: In the original notice of proposed rule published in the Bulletin on July 1, 2014, DAQ stated that the rule does not apply to small businesses and therefore there were no anticipated costs or savings. That statement that the rule does not apply to small businesses was incorrect as there are many oil and natural gas producers in Utah that the rule applies to. Therefore, this rule does apply to small businesses, and while there is an initial cost to replace pneumatic controllers, there is also a benefit to the operators as the natural gas is recaptured and can be sold as product. EPA's Natural GAs STar Program estimates a cost of \$2,104 to replace an existing high-bleed controller. More recently, Colorado estimated initial costs of \$1,420 to replace each high-bleed pneumatic controller. At current natural gas prices, the new devices will pay for themselves in about 1 1/2 to 2 years and will then continue to provide on-going savings to the company. Additionally, the change in the reporting requirements in this rulemaking action should result in a minimal amount of savings to small businesses, as they will now be required to report only the high-bleed controllers that could not be replaced rather than report all controllers there were replaced.

◆ PERSONS OTHER THAN SMALL BUSINESSES, BUSINESSES, OR LOCAL GOVERNMENTAL ENTITIES: The change in the rule to require the reporting of high-bleed controllers that could not be replaced rather than the reporting of all controllers there were replaced does not place any additional requirements on persons other than small businesses, businesses, or local government entities; therefore, there are no anticipated costs or savings.

COMPLIANCE COSTS FOR AFFECTED PERSONS: This change in proposed rule should not result in any additional compliance costs. In fact, it should slightly reduce compliance costs as sources would only be required to report high-bleed controllers that could not be replaced rather than report all controllers that were replaced.

COMMENTS BY THE DEPARTMENT HEAD ON THE FISCAL IMPACT THE RULE MAY HAVE ON BUSINESSES: This change in proposed rule should not result in any additional compliance costs. In fact, it should slightly reduce compliance costs as sources would only be required to report high-bleed controllers that could not be replaced rather than report all controllers there were replaced.

NOTICE OF CHANGE IN PROPOSED RULE

DAR FILE NO.: 38581 FILED: 10/07/2014

RULE ANALYSIS

PURPOSE OF THE RULE OR REASON FOR THE CHANGE: The Utah Air Quality Board proposed this new rule, R307-503, for public comment on 06/04/2014. A 30-day public comment period was held, during which the Division of Air Quality (DAQ) received comments that resulted in changes being made to the originally proposed rule. The comments received asked for certain terms to be defined and raised concerns regarding the cost to install an auto-ignitor on an open flare. Retrofits were limited to enclosed flares in response to this comment.

SUMMARY OF THE RULE OR CHANGE: Definitions for "enclosed flare", "flare", and "open flare" are added to the rule. The rule is also modified to require retrofits only on enclosed flares. The applicability date for all new flares has been changed to 01/01/2015 to reflect the expected effective date of this rule. (DAR NOTE: The original proposed new rule upon which this change in proposed rule (CPR) was based was published in the July 1, 2014, issue of the Utah State Bulletin, on page 42. Underlining in the rule below indicates text that has been added since the publication of the proposed new rule mentioned above; strike-out indicates text that has been deleted. You must view the CPR and the proposed new rule together to understand all of the changes that will be enforceable should the agency make this rule effective.)

STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS RULE: Subsection 19-2-104(1)(a)

ANTICIPATED COST OR SAVINGS TO:

◆ THE STATE BUDGET: The changes made to this rule do not apply to the state; therefore, there are no anticipated costs or savings to the state budget.

◆ LOCAL GOVERNMENTS: The changes made to this rule do not apply to local government; therefore, there are no anticipated costs or savings.

◆ SMALL BUSINESSES: In the original notice of proposed rule published in the Bulletin on July 1, 2014, DAQ stated that the rule does not apply to small businesses and therefore there were no anticipated costs or savings. That statement was incorrect as there are many oil and natural gas

producers in Utah that the rule applies to. Colorado estimated a cost of \$2,348 to retrofit an existing flare with an auto igniter, with an annualized cost of \$475. The overall cost effectiveness of the retrofit was \$302/ton of VOC reduced. Because the change in proposed rule removes the requirement to retrofit existing open flares, there will be a savings; however, it is difficult to determine how many open flares will now no longer be required to be retrofitted.

◆ PERSONS OTHER THAN SMALL BUSINESSES, BUSINESSES, OR LOCAL GOVERNMENTAL ENTITIES: The changes to this rule do not apply to persons other than small businesses, businesses, or local government entities; therefore, there are no anticipated costs or savings.

COMPLIANCE COSTS FOR AFFECTED PERSONS: This change results in a reduction of compliance costs for affected persons because it removes the requirement to retrofit existing open flares. The number of open flares that will no longer need to be retrofitted is unknown, so the reduction in compliance costs is unknown.

COMMENTS BY THE DEPARTMENT HEAD ON THE FISCAL IMPACT THE RULE MAY HAVE ON BUSINESSES: This change results in a reduction of compliance costs for affected persons because it removes the requirement to retrofit existing open flares. The number of open flares that will no longer need to be retrofitted is unknown, so the reduction in compliance costs is unknown.

CONCISE EXPLANATION OF THE PARTICULAR STATUTORY PROVISIONS UNDER WHICH THE RULE IS

ENACTED AND HOW THESE PROVISIONS AUTHORIZE OR REQUIRE THE RULE: This rule is authorized by Subsection 26-33a-104(1) to "direct a statewide effort to collect, analyze, and distribute health care data to facilitate the promotion and accessibility of quality and cost-effective health care and also to facilitate interaction among those with concern for health care issues."

SUMMARY OF WRITTEN COMMENTS RECEIVED DURING AND SINCE THE LAST FIVE YEAR REVIEW OF THE RULE FROM INTERESTED PERSONS SUPPORTING OR OPPOSING THE RULE: Regence BCBSU (October 2013): Can you extend the 30-day period for extensions to reduce paperwork and staff time, when longer extension periods are In summary, OHCS provided the following needed? response: Our reason for requiring a separate request every 30 days is so that we can best track movement by the submitter toward compliance. United Healthcare (October 2013): Please confirm whether or not the current registration process through the following Utah Office of Health Care Statistics site: http://health.utah.gov/hda/apd/paver registration.php will remain the same. In summary, OHCS provided the following response: Yes, this requirement will remain the same. At its meeting on 05/13/2014, the Utah Health Data Committee (HDC) unanimously approved the most recent edits to Rule R428-15. HDC members represent various interests in Utah including payers, physicians, hospitals, public health, business, and consumers. Per the Utah Department of Health (UDOH) legal office, Center for Health Data, Health Care Statistics can appropriately use the aforementioned approval for current, five-year review purposes (October 2014).

REASONED JUSTIFICATION FOR THE CONTINUATION OF THE RULE, INCLUDING REASONS WHY THE AGENCY DISAGREES WITH COMMENTS IN OPPOSITION TO THE RULE, IF ANY: This rule establishes requirements for certain entities that pay for health care to submit data to UDOH. The data are needed to develop and maintain an All Payer Claims Database (APCD). The APCD assists in the comparison of health care cost efficiencies and effectiveness statewide from both a cross sectional as well as from more longitudinallybased, disease progression perspective. Current requests for secure and approved use of APCD data are received from a variety of sources including gualified researchers, institutions, and inter-agency staff. Many analytic reports are expected over the next year that will help monitor trends in claims, costs, and quality of care for the people in Utah. The uses of the data and reports are justifications for continuation of the rule.

NOTICE OF REVIEW AND STATEMENT OF CONTINUATION

CONCISE EXPLANATION OF THE PARTICULAR STATUTORY PROVISIONS UNDER WHICH THE RULE IS ENACTED AND HOW THESE PROVISIONS AUTHORIZE OR REQUIRE THE RULE: Section 77-27-9 authorizes the Board of Pardons and Parole to conduct hearings. Impartiality must be maintained by recusing a hearing officer or Board member who has a conflict of interest. Ex parte communication would jeopardize the impartiality of the hearing and is not allowed.

SUMMARY OF WRITTEN COMMENTS RECEIVED DURING AND SINCE THE LAST FIVE YEAR REVIEW OF THE RULE FROM INTERESTED PERSONS SUPPORTING OR OPPOSING THE RULE: No comments have been received.

REASONED JUSTIFICATION FOR THE CONTINUATION OF THE RULE, INCLUDING REASONS WHY THE AGENCY DISAGREES WITH COMMENTS IN OPPOSITION TO THE RULE, IF ANY: The public and offenders must have confidence that the Board is making decisions impartially. The rule provides for the recusal of hearing officers or Board members and an avenue for an offender to appeal if the offender believes the officer has a conflict of interest. Ex parte communication is not allowed so that both parties can respond to any information used by the Board. Therefore, this rule should be continued. THE FULL TEXT OF THIS RULE MAY BE INSPECTED, DURING REGULAR BUSINESS HOURS, AT:

PARDONS (BOARD OF) ADMINISTRATION ROOM 300 448 E 6400 S SALT LAKE CITY, UT 84107-8530 or at the Division of Administrative Rules.

NOTICES OF RULE EFFECTIVE DATES

State law provides for agencies to make their administrative rules effective and enforceable after publication in the *Utah State Bulletin*. In the case of **P**ROPOSED **RULES** or **CHANGES IN PROPOSED RULES** with a designated comment period, the law permits an agency to make a rule effective no fewer than seven calendar days after the close of the public comment period, nor more than 120 days after the publication date. In the case of **CHANGES IN PROPOSED RULES** with no designated comment period, the law permits an agency to make a rule effective on any date including or after the thirtieth day after the rule's publication date, but not more than 120 days after the publication date. If an agency fails to file a **NOTICE OF EFFECTIVE DATE** within 120 days from the publication of a **PROPOSED RULE** or a related **CHANGE IN PROPOSED RULE** the rule lapses.

Agencies have notified the Division of Administrative Rules that the rules listed below have been made effective.

Notices of Effective Date are governed by Subsection 63G-3-301(12), Section 63G-3-303, and Sections R15-4-5a and R15-4-5b.

RULES INDEX BY AGENCY (CODE NUMBER) AND BY KEYWORD (SUBJECT)

The Rules Index is a cumulative index that reflects all effective changes to Utah's administrative rules. The current Index lists changes made effective from January 2, 2014 through October 15, 2014. The Rules Index is published in the Utah State Bulletin and in the annual Utah Administrative Rules Index of Changes. Nonsubstantive changes, while not published in the Bulletin, do become part of the Utah Administrative Code (Code) and are included in this Index, as well as 120-Day (Emergency) rules that do not become part of the Code. The rules are indexed by Agency (Code Number) and Keyword (Subject).

Questions regarding the index and the information it contains should be addressed to the Division of Administrative Rules (801-538-3764).

A copy of the **R**ULES INDEX is available for public inspection at the Division of Administrative Rules (5110 State Office Building, Salt Lake City, UT), or may be viewed online at the Division's web site (http://www.rules.utah.gov/).
